

TEXAS TECH UNIVERSITY
HEALTH SCIENCES CENTER

FACT BOOK

Nineteenth Edition

December, 2012
Prepared by the Office of the
Executive Vice President for Finance & Administration

PREFACE

The Office of the Executive Vice President for Finance & Administration is pleased to provide Texas Tech University Health Sciences Center with a Fact Book. This edition is the nineteenth annual issue produced by this office as a service to TTUHSC.

We offer this Fact Book as a means of providing a common set of data which will be readily available to decision-makers throughout the Health Sciences Center. We hope that the Fact Book will also aid in achieving the institution's goal of providing the highest standard of excellence in higher education while pursuing continuous quality improvement, stimulating the greatest degree of meaningful research, and supporting faculty and staff in satisfying those whom we serve.

This Fact Book can be accessed on-line at the TTUHSC home page at <http://www.ttuhscc.edu/hsc/factbook/>.

We encourage and invite comments, reactions, suggestions, and corrections as a means of improving future issues.

Statement of Accreditation

Texas Tech University Health Sciences Center is accredited by the Southern Association of Colleges and Schools Commission on Colleges to award bachelor's, master's, doctoral, and professional degrees. Contact the Commission on Colleges at 1866 Southern Lane, Decatur, Georgia 30033-4097, or call 404-679-4500 with questions about the accreditation status of Texas Tech University Health Sciences Center.

MISSION AND VISION STATEMENTS

MISSION STATEMENT

The mission of Texas Tech University Health Sciences Center is to improve the health of people by providing high quality educational opportunities to students and health care professionals, advancing knowledge through scholarship and research, and providing patient care and service.

VISION STATEMENT

Texas Tech University Health Sciences Center will become a nationally recognized health sciences university.

TEXAS TECH UNIVERSITY HEALTH SCIENCES CENTER

History

The Texas Tech University School of Medicine was created by the 61st Texas Legislature in May, 1969 as a multi-campus institution with Lubbock as the administrative center, and with regional campuses at Amarillo, El Paso, and Odessa. In 1979, the charter was expanded to become the Texas Tech University Health Sciences Center (TTUHSC), leading the way for establishment of the Schools of Nursing and Allied Health Sciences, and the Graduate School of Biomedical Sciences. In 1993, the legislature authorized the establishment of a School of Pharmacy to be located in Amarillo. In addition, Allied Health Sciences programs were expanded to Amarillo and the Permian Basin. In 2003, the legislature authorized the establishment of a four-year medical school in El Paso, and in 2011, the Gayle Greve Hunt School of Nursing was established, also located in El Paso. The seven schools are committed to regionalized, multi-campus educational experiences, and to the related biomedical research, graduate studies, patient care and community service required of a health sciences center. A primary effort is made to achieve a balanced group of students with qualified minority students, diverse age groups, and heterogeneous backgrounds in educational and life experiences. A special effort is made to recruit applicants from West Texas and from rural and border communities.

The Health Sciences Center has as its major objectives the provision of quality education and the development of academic, research, patient care, and community service programs to meet the health care needs of the 108 counties of West Texas, which comprise 50% of the land mass and 11% of the population of the total state. This 131,000 square mile service area and population of 2.7 million has been, and remains highly underserved by health professionals and accessible health care facilities, despite the substantial and meaningful contribution made by our institution. Demographic shifts in West Texas populations, as well as socioeconomic and epidemiologic characteristics of its sub-groups, create major and specific demands for service. While education of students and residents remains the primary focus of the institution, there has been an important impact on the health status of West Texas. The lack of a single locus of population density has resulted in the regionalization of medical and health care education and patient care on multiple geographically separated campuses. In providing an excellent quality undergraduate, graduate, and continuing health professional education at each site, the health needs of the larger community have been better met and relevant indices of health status demonstrate significant improvement.

The growing evidence confirms that the School of Medicine, which celebrated its 40-year anniversary in 2009, is accomplishing its mission of educating and placing practicing physicians in West Texas. With increasing demand for medical education, primarily along the Texas/Mexico border, legislation was signed in October 2003 establishing a new four-year medical school in El Paso. The school was accredited in February 2008, and welcomed its inaugural class in July 2009. It was renamed the Paul L. Foster School of Medicine in 2009. The Schools of Nursing and Allied Health Sciences continue their impact on the health care needs of West Texas, with most of their graduates remaining in West Texas to pursue their chosen profession. The School of Nursing celebrated its 30th anniversary in October 2011. Upon approval by the Texas Higher Education Coordinating Board and the Texas Board of Nursing, the Gayle Greve Hunt School of Nursing officially opened as a free-standing school of nursing in September 2011. The School of Pharmacy celebrated a decade of excellence in August 2006. The school's expansion continues with the establishment of a four-year program at a new campus in Abilene, which began classes in August 2007.

TTUHSC is a component of the Texas Tech University System. The President of TTUHSC reports to the Chancellor, who is the Chief Executive Officer of the System. The Chancellor and the President are responsible to the TTUS Board of Regents, which sets overall policy for TTUS, Texas Tech University, TTUHSC, and Angelo State University. The current members of the Board of Regents are as follows:

<u>Regent</u>	<u>Term Ends</u>	<u>Hometown</u>
Larry K. Anders	Jan. 31, 2017	Dallas
L. Frederick “Rick” Francis	Jan. 31, 2013	El Paso
Mickey L. Long, Vice Chair	Jan. 31, 2015	Midland
Debbie Montford	Jan. 31, 2017	San Antonio
Nancy R. Neal	Jan. 31, 2015	Lubbock
John F. Scovell	Jan. 31, 2013	Dallas
John D. Steinmetz	Jan. 31, 2017	Lubbock
Suzanne Taylor, Student Regent	May 31, 2013	Arlington
Jerry E. Turner, Chair	Jan. 31, 2013	Blanco
John Walker	Jan. 31, 2015	Houston

The Deans of the School of Medicine, School of Nursing, School of Allied Health Sciences, School of Pharmacy, the Graduate School of Biomedical Sciences, the Paul L. Foster School of Medicine, and the Gayle Greve Hunt School of Nursing report to the President as Chief Executive Officer of TTUHSC. Administrative governance and authority of the medical school is situated in Lubbock, and the Dean, as Chief Academic Officer, is fully responsible for the conduct and maintenance of quality educational experiences and related academic and clinical programs offered by the campuses at Amarillo and Odessa. The Regional Deans of Medicine at Amarillo and Odessa are responsible to the Dean of the School of Medicine in Lubbock for academic programs enabling the Dean to maintain quality assurance in the academic program. The School of Nursing and the School of Allied Health Sciences utilize the same administrative model. Regional Deans of Allied Health Sciences in Amarillo, Midland and Odessa, and the Regional Deans of Nursing in Odessa and Abilene, report directly to their respective Deans in Lubbock. This regional concept allows the Schools to establish and operate student education programs, physician residency training programs, continuing education programs, and outreach programs that have proven to be a vital factor in the placement of graduates in practice sites in West Texas, and to support the practice of medicine, nursing, and allied health sciences in this vast area. The Dean of Pharmacy is located in Amarillo, with Regional Deans being located in Lubbock, Dallas, and Abilene reporting to the Dean in Amarillo. The Founding Dean of the Paul L. Foster School of Medicine and the Interim Dean of the Gayle Greve Hunt School of Nursing, both located in El Paso, have no Regional Deans reporting to them.

In June of 2008, TTUHSC adopted the Institutional Compliance Program (ICP). The Office of Institutional Compliance is responsible for implementing the ICP by advancing an institutional culture of ethics, integrity and compliance with laws, regulations and policies at TTUHSC. This is accomplished through awareness programs (such as policies and training), monitoring activity and response to reports of non-compliance. There are various reporting mechanisms available to members of the TTUHSC community to confidentially report concerns of regulatory non-compliance, including the anonymous TTUS Compliance Hotline. Reported concerns are investigated and corrective action is implemented to address any identified non-compliant activity.

The Institutional Compliance Officer reports to the President, and chairs the Institutional Compliance Committee and Institutional Compliance Working Committee. This individual also has primary oversight of the TTUHSC Billing Compliance Program and HIPAA Privacy, and serves as a resource for other TTUHSC areas that have regulatory oversight responsibilities. Each SOM regional campus has a Billing Compliance Director who reports directly to the Institutional Compliance Officer. The Institutional Privacy Officer reports to the Institutional Compliance Officer and serves as the primary privacy official for the institution, supervising Regional Privacy Officers at the El Paso, Amarillo, and Permian Basin campuses.

An institutional philosophy that further supports quality services to the students, patients, faculty and staff was enhanced in 1990. The thrust of the initiative is three-fold: provide customer service skills training to employees, assist departments in quality improvement efforts, and recognize individuals and teams for excellence in quality service. The initiative is called *SERVICEplus*. The customer awareness program of *SERVICEplus* helps employees identify who they serve and to understand and exceed the needs and expectations of these constituents.

The Office of HSC Relations coordinates an annual quality service recognition program for staff employees. This prestigious award recognizes staff employees who have been continuously employed at Texas Tech in a benefits-eligible position for at least two years, who have completed the *SERVICEplus* educational program, and who demonstrate excellence in service. Two levels of awards exist: the Quality Service Award and the Chancellor's Award of Excellence, whereby honorees receive a plaque, certificate, and a monetary award ranging from \$500 to \$1,500.

The Health Sciences Center is continually striving to make the institution and its programs the most cost effective possible, which has been particularly important as the institution has been growing and developing its programs. In 1985, general revenue made up more than 50% of the total operating budget of the Health Sciences Center. Now, in fiscal year 2013, general revenue is 23.4% of the total budget. Even though the Health Sciences Center has been able to sustain the growth of its schools and programs, adequate levels of state appropriated funds are essential to accomplish the central mission of providing health care education of the highest quality.

The Health Sciences Center is proud of the accomplishments that have been achieved by this institution. Some of these include:

SCHOOL OF MEDICINE

- Over the past five years, approximately 57% of graduates have remained in Texas to complete residency training, and an average of 16% of School of Medicine graduates have remained in a Texas Tech program for residency training.
- Over 20% percent of the practicing physicians in West Texas are Texas Tech medical school and/or residency graduates.

- Over the past five years, an average of 45% of all medical school graduates have elected to enter the primary care specialties of Family Medicine, Internal Medicine, Obstetrics and Gynecology, and Pediatrics. In 2012, 38% of graduates elected primary care specialties.
- Each of the TTUHSC campuses has been shown to place the majority of its program graduates who stay in West Texas within a 75-mile radius of the campus. The regional campus system has a positive impact on the geographic distribution of physicians throughout West Texas. In 1969, there was one physician for every 1,300 residents in the region, and today this ratio has decreased to nearly one doctor for every 750 residents.
- In recent years, the School of Medicine has combined efforts with Texas Tech University to offer joint academic programs addressing the growing needs of practicing physicians. In the summer of 1998, a venture began with the Rawls College of Business Administration providing the ability to obtain both MD and MBA degrees. To date, 96 students have completed this program. Most recently, a joint JD and MD program to be offered in collaboration with the Texas Tech University School of Law began in the fall of 2009 where students interested in future careers focusing on health care policy, bioterrorism, and medical law can receive both degrees.
- The campuses of the Schools of Medicine operate 28 individually accredited residency programs and 16 fellowship programs in West Texas. As of October, 2012, these programs had 601 total residents in training, which includes 34 fellows, of which 385 (64.1%) were in primary care fields of Family Practice, Internal Medicine, OB/GYN and Pediatrics. Of the 385 total primary care residents in training, 90 are specifically in Family Practice. The 44 residency and fellowship programs have 172 first year trainees, and will graduate approximately 183 residents and fellows in 2013.
- The four campuses operate a total of 29 clinical departmental units and numerous clinical services and education programs which were previously unavailable in the West Texas region. A partial list of specialty services includes: care for women and infants, including perinatal care and neonatal intensive care (four campuses), pediatric subspecialty services and intensive care (four campuses), trauma centers and emergency medicine (two campuses), neurology and neuroscience centers (two campuses), a center for pain treatment and research, a regional burn center, a center for Alzheimer's disease, a cancer center and a program for bone marrow transplantation, and a border community breast care program.
- The patient care programs of the School of Medicine serve as the base for clinical education of medical students and residents, the base for clinical research and as a major source of care for citizens of West Texas. In fiscal year 2012, the School of Medicine and Paul L. Foster School of Medicine provided 667,487 clinical visits of care to 288,608 patients. The Schools also served 61,662 inpatients in its affiliated hospitals, and provided a total of \$74,104,965 in uncompensated care.

PAUL L. FOSTER SCHOOL OF MEDICINE

In 1998, TTUHSC at El Paso celebrated 25 years serving the El Paso community. The following year, then-Texas Tech System Chancellor John T. Montford shared with the Board of Regents a vision for a full-fledged four-year medical school in El Paso to help alleviate a severe shortage of physicians in the area. Currently, there are less than 110 physicians for every 100,000 people in El Paso. The national average is 198 physicians per 100,000 patients. The Texas average is only 150 per 100,000. Studies have shown that most medical students remain in the region in which they received their education to establish their practices. The addition of the first two years of the medical school would allow students from El Paso and nearby regions to complete their education near home, in hopes of retaining doctors in the area.

- In 2001, longtime community philanthropists J.O. and Marlene Stewart donated 10.2 acres of land near the HSC for the new medical campus. The Paso del Norte Foundation approved a \$1.25 million dollar scholarship grant program for local students contingent on the approval of the four-year medical school.
- During the 2001 Texas Legislative Session (77th), the El Paso legislative delegation successfully spearheaded an effort to secure \$40 million in tuition revenue bonds for the research facility, one of three buildings on the new campus, just a short walk from the Texas Tech University Health Sciences Center—as well as an \$11 million dollar clinic expansion project that took about two years, and added a third floor on the present TTUHSC at El Paso Medical Center building.
- In 2002, the Paso del Norte Health Foundation announced a \$1.25 million scholarship/grant loan program for TTUHSC at El Paso students choosing to practice in El Paso. By working together with TTUHSC, the Foundation would help meet the demand for physicians and provide the perfect environment for area students to improve their medical education, while contributing to the health of our region.
- In 2003, Texas Governor Rick Perry visited the El Paso campus for a ceremonial signing of House Bill 28, article 10, which authorized Texas Tech to issue \$45 million in tuition revenue bonds for the construction of a classroom/office building for a four-year medical school at the El Paso campus. The governor also announced an additional \$2 million in funding to finance start-up costs and faculty salaries.
- TTUHSC at El Paso Regional Dean Jose Manuel de la Rosa, M.D., was also appointed by President George W. Bush to the United States-Mexico Border Health Commission, recognizing TTUHSC as a national leader in border health issues. The bi-national commission developed and coordinated actions to improve the health and quality of life along the United States-Mexico border and studied ways to solve the border's health problems, a mission that mirrors that of TTUHSC at El Paso.
- On December 9, 2003, the ground breaking for El Paso Medical Science Building I took place and two years later in January of 2006, a ribbon cutting followed. The 93,000 square-foot facility houses research on diabetes, cancer, environmental health and infectious diseases, as well as a repository dedicated to data on Hispanic health and a genomic facility to link hereditary diseases in families.

- In February 2008, the new school was preliminarily accredited by the Liaison Committee for Medical Education (LCME).
- In 2009, the school was renamed the Paul L. Foster School of Medicine (PLFSOM), and on July 13, 2009, the Inaugural Class of 40 students was admitted and began classes.
- In 2010, in collaboration with University of Texas Health Sciences Center in Houston – School of Public Health, the school established a dual degree MD/MPH Program. Currently 20 students are enrolled in this program.
- In May 2011, Founding Dean Jose Manuel de la Rosa was named Vice President for Health Affairs.
- In 2012, the fourth class of 80 students for PLF SOM was admitted and began classes in July, 2012. Additionally, Research awards approached \$14M, increasing from approximately \$13M in 2011.

GRADUATE SCHOOL OF BIOMEDICAL SCIENCES

- The Graduate School of Biomedical Sciences, originally a part of the School of Medicine, became a separate school in 1994 to coordinate the training of biomedical scientists. It provides educational opportunities for students who seek research careers in the biomedical sciences to advance our knowledge about normal and disease conditions in humans.
- Originally, as part of the School of Medicine, its first masters of science degree was awarded in 1975 in medical microbiology, followed by its first doctoral degree awarded in 1978 in physiology.
- The Graduate School of Biomedical Sciences (GSBS) currently has three graduate programs: Biotechnology, Biomedical Sciences, and Pharmaceutical Sciences. Concentrations within the Lubbock Biomedical Sciences program include Cell and Molecular Biology, Cell Physiology & Molecular Biophysics, Biochemistry and Molecular Genetics, Immunology & Infectious Diseases, and Pharmacology & Neurosciences. Although some graduates of these programs work in private industry, most hold postdoctoral fellowships and faculty positions at major medical schools throughout the United States and abroad.
- In 2012, the Lubbock Biomedical Sciences program expanded to El Paso. Students applying to the GSBS in El Paso will be in the Biomedical Studies concentration and its first class is expected in the Spring of 2013.
- The philosophy of the GSBS is to provide each student with a broad understanding of biomedical research, yet develop the specialization needed to succeed as an independent investigator. This is accomplished on the Lubbock campus by requiring doctoral students to complete a common core curriculum. The core curriculum consists of courses in Molecules, Cells, Genes, Seminar and an introduction to Biomedical Research.

- The M.D./Ph.D. combined degree program has graduated eight M.D./Ph.D. students and has nine students currently enrolled. GSBS graduated their first husband and wife team in May, 2002, awarding both with an M.D./Ph.D. degree.

SCHOOL OF NURSING

The TTUHSC School of Nursing is the only nursing school on the South Plains that provides baccalaureate, masters, and doctoral education. Since its inception in 1979, the school has planned innovative degrees to meet the needs of Texas residents. With an expanded selection of educational options offered throughout Texas and beyond, the School of Nursing continues to help bolster the state's nursing workforce by educating more than 1,400 students each year.

The first students were admitted to the Traditional Bachelor of Science in Nursing four-year degree on the Lubbock campus on August 26, 1981. Additionally, LVN students were admitted to the sophomore year and RN students were admitted to the junior year. Four years later, RN to BSN only students were admitted in the Permian Basin. The first students were admitted to the Master of Science in Nursing track in 1988 and the Accelerated Second Degree track was launched in Austin/Hill Country and in Lubbock in 2005, and is now offered in Abilene, the Permian Basin and El Paso. In 2008, the inaugural cohort of doctoral students was admitted into the Doctor of Nursing Practice degree program, and in 2009, the Traditional BSN program was expanded to include Abilene, the Permian Basin and El Paso.

The school on the Lubbock campus was renamed in honor of Anita Thigpen Perry, the first lady of Texas, in August 2008. The Anita Thigpen Perry School of Nursing is known for innovation in nursing education, excellent student retention and graduation rates, above national average National Council Licensure Examination (NCLEX) scores, and producing well-prepared nurses for West Texas and beyond. In October 2010, through a generous donation from the Hunt Family Foundation, successful efforts were made to establish the Gayle Greve Hunt School of Nursing in El Paso. Upon receiving approval from the Texas Higher Education Coordinating Board and the Texas Board of Nursing in April 2011, the Gayle Greve Hunt School of Nursing officially opened as a free-standing school of nursing on September 1, 2011.

UNDERGRADUATE STUDIES: The Bachelor of Science in Nursing track options include traditional, licensed RN and second degree (individuals with a bachelor's degree in another field) students. The school offers the following undergraduate programs:

- Bachelor of Science in Nursing (BSN)
- Registered Nurse to Bachelor of Science in Nursing (RN to BSN)
- Second Degree Web-based BSN (Second Degree)

GRADUATE PROGRAMS: Graduate Studies uses a variety of online technology teaching-learning methods to offer distance education classes and face-to-face classes in Lubbock, Odessa and Abilene. The school offers the following graduate degrees:

- Leadership Studies
 - Master of Science in Nursing – Administration Track
 - Master of Science in Nursing – Education Track
 - Doctorate of Nursing
 - PhD in Nursing (in collaboration with Texas Women’s University)
- Nurse Practitioner Studies
 - Master of Science in Nursing – Family Nurse Practitioner (FNP) and Post-Masters FNP Track
 - Master of Science in Nursing – Acute Care Nurse Practitioner (ACNP) and Post-Masters ACNP Track
 - Master of Science in Nursing – Pediatric Nurse Practitioner (PNP) and Post-Masters PNP Track
 - Master of Science in Nursing – Geriatric Nurse Practitioner (GNP) and Post-Masters GNP Track

Two Centers of Excellence have been established at the School of Nursing. These Centers are multidisciplinary and/or interdisciplinary groups of faculty and their associates who have been brought together for the pursuit of research, education, and/or clinical activities. The goals of each center integrate into the strategic plan of the school.

Center for Innovation in Nursing Education: The CINE provides leadership in designing and implementing new and exciting nursing education initiatives to change the nature and quality of nursing education within Texas and throughout the nation.

Center for Excellence in Evidence-Based Practice: The CEEBP forms collaborations to improve the care and safety of patients through consultation, research, education, and practice as demonstrated through multiple avenues.

CAMPUSES: The TTUHSC School of Nursing has educational opportunities at the following TTUHSC locations:

- Abilene
- Lubbock
- Permian Basin

GAYLE GREVE HUNT SCHOOL OF NURSING

The Gayle Greve Hunt School of Nursing (GGHSON) was launched through the generous donation of \$10 million by the Hunt Family Foundation in 2010. The school was named Gayle Greve Hunt in honor of the well-known El Paso, Texas stakeholders, the Hunt family, and in acknowledgement of their extraordinary gift. The GGHSON received initial approval from the Texas Board of Nursing and the Texas Higher Education Coordinating Board in 2011. It is anticipated that it will receive accreditation from the Commission on Collegiate Nursing Education upon a successful survey site visit in September of 2012. The GGHSON responded to a severe and chronic nursing shortage in the greater El Paso region by admitting its first class of thirty eight (38) Traditional Bachelor of Science in Nursing (BSN) program students in

Fall 2011. The demographic composition of this class mirrors that of the residents of El Paso as demonstrated by an 80% Hispanic student representation.

The first class of thirty one (31) Second Degree BSN students was admitted in Spring 2012, and its class demographics mirrored the composition of El Paso as well. The GGHSON is positioned on the U.S./Mexico border, alongside the Paul L. Foster School of Medicine, to become the gold standard for evidenced-based nursing education in an interprofessional and international context.

UNDERGRADUATE PROGRAMS: BSN programs are for traditional, licensed RN and second degree students (individuals with a Baccalaureate degree in a non-nursing field). The school offers the following undergraduate degree programs:

- BSN
- Second Degree BSN

COMMUNITY SERVICE: The GGHSON responds to critical El Paso region community healthcare service needs through its free-of-charge, drop-in service Baby Café that promotes breastfeeding through peer support. The Baby Café offers support to breastfeeding mothers and families throughout the El Paso region through an expert lactation consultant advocate.

The Gayle Greve Hunt School of Nursing was awarded \$11M by the Medical Center of the Americas in 2012 for a new SON building that will break ground in August 2013.

SCHOOL OF ALLIED HEALTH SCIENCES

- The School of Allied Health Sciences offers eighteen different doctoral, masters, baccalaureate, and post baccalaureate health professions degree programs in the rehabilitation sciences; clinical laboratory sciences; speech, language and hearing sciences; and disciplines related to primary care and healthcare management. With a Fall 2012 enrollment of 1325 students on four campuses (Lubbock, Amarillo, Odessa and Midland), it is one of the largest and most diverse schools of Allied Health Sciences in Texas. From our first class of eighteen students in 1983, the School has grown steadily over the past 29 years. The School continues to educate allied health professionals to meet the evolving healthcare needs of all people in West Texas, the state and the nation. The School of Allied Health Sciences remains focused on developing and presenting educational programs of the highest quality in a student-centered learning environment.
- Academic degree programs offered include a Ph.D. degree in Communication Science and Disorders, as well as a Ph.D. in Rehabilitation Sciences; Doctor of Audiology (AuD), Doctor of Science in Physical Therapy (ScD/PT) and Doctor of Physical Therapy (DPT/Transitional DPT); Master of Science degrees in Molecular Pathology, Speech-Language Pathology, and Clinical Practice Management; professional Masters degrees in Athletic Training (MAT), Occupational Therapy (MOT), Physician

Assistant Studies (MPAS), and Rehabilitation Counseling (MRC); and Bachelor of Science degrees in Clinical Laboratory Science; Speech, Language and Hearing Sciences; Clinical Services Management; and Health Sciences.

- To increase educational access to allied health professionals who are serving communities throughout rural West Texas and the state, some programs rely extensively on non-traditional formats or distance education technologies. The ScD, PT employs a unique combination of weekend clinical clusters in communities around the state and nation that are supported by distance education technology, as well as short, intensive periods on campus to offer practicing physical therapists the opportunity to achieve advanced clinical skills and competencies while maintaining their practice. The Transitional DPT (Doctor of Physical Therapy) pathway is an online program designed to provide practicing physical therapists with a Masters degree (MPT) the opportunity to earn a clinical doctorate. The physical therapy profession has recently migrated from an entry level MPT to the DPT. The Transitional DPT allows MPT clinicians to advance their knowledge to a level consistent with the current professional DPT standards. Students can continue their full-time employment while enrolled in the online program, as the clinical setting provides the ideal environment to apply newly-learned information. The M.S. in Clinical Practice Management provides an internet-based opportunity for traditional clinicians and other health professionals to expand their knowledge and skills in clinical practice management without leaving their communities. Similarly, the Master of Rehabilitation Counseling provides an opportunity for vocational rehabilitation counselors of the Texas Rehabilitation Commission, other State agencies and within the private sector to obtain their professional credentials while continuing to serve their clients. The Bachelor of Science in Clinical Laboratory Science program offers a second degree online tract for students who already hold a Bachelor of Science degree. A second online tract is available for students who wish to earn a certificate in clinical laboratory science. Both online tracts qualify students to sit for the national certification in clinical laboratory science through the American Society of Clinical Pathology Board of Certification. The Bachelor of Science in Clinical Services Management provides a web-based baccalaureate degree for traditional undergraduate students and graduates of community college Associate of Applied Science programs to prepare for career ladder progression, while continuing employment within their communities.
- In addition to its eighteen different degree programs, the School operates two Centers that have been approved by the Texas Tech University System Board of Regents:
 - The **Center for Speech, Language and Hearing Research** within the Department of Speech, Language and Hearing Sciences, seeks to integrate and support cross-disciplinary efforts in research, teaching and patient care that are aimed at increasing understanding and treatment of hearing, speech and/or language disorders across the lifespan.
 - The **Center for Rehabilitation Research** within the Department of Rehabilitation Sciences consists of four clinical research laboratories (Clinical Biomechanics Laboratory, Clinical Postural Control Laboratory, Clinical Musculoskeletal Research Laboratory, and Clinical Anatomy Research Laboratory), and integrates and promotes interdisciplinary research

and clinical services in the Rehabilitation Sciences. This center is the research environment for the PhD in Rehabilitation Sciences program.

- Personnel shortages continue in many of the Allied Health Sciences professions. Shortages are most acute in the clinical laboratory sciences, and for speech-language pathologists, audiologists, physician assistants, physical therapists and occupational therapists. Increasing demands for physical therapists and occupational therapists are projected for the foreseeable future to meet the needs of an aging population. Similarly, the demand for certified and licensed athletic trainers is expected to grow dramatically within our society.
- The School has an active faculty development program to encourage and provide financial support for faculty who participate in doctoral studies. With critical, national shortages of doctorally prepared faculty in the School's disciplines, this "grow your own" approach continues to strengthen the knowledge, skills and abilities of our faculty.
- Departments within the School of Allied Health Sciences include:

Laboratory Sciences and Primary Care

MS, Molecular Pathology	Master of Physician Assistant Studies (MPAS)
BS, Clinical Laboratory Science	BS, Clinical Laboratory Science, Second Degree
Clinical Laboratory Science Post Baccalaureate Certificate	

Rehabilitation Sciences

PhD, Rehabilitation Sciences	Doctor of Science (ScD) in Physical Therapy
Doctor of Physical Therapy (DPT)	Transitional Doctor of Physical Therapy Pathway (DPT)
Master of Athletic Training (MAT)	Master of Occupational Therapy (MOT)

Speech, Language and Hearing Sciences

Ph.D., Communication Sciences and Disorders	Doctor of Audiology (AuD)
MS, Speech-Language Pathology	BS, Speech, Language and Hearing Sciences

Clinic Administration and Rehab Counseling

MS, Clinical Practice Management	Master of Rehabilitation Counseling (MRC)
BS, Clinical Services Management	

SCHOOL OF PHARMACY

- The TTUHSC School of Pharmacy (SOP) was established in 1993 to offer the degree of Doctor of Pharmacy (Pharm.D). In addition to the traditional Pharm.D. program, the School also supports a graduate Ph.D./M.S. program in Pharmaceutical Sciences and a Residency program in advanced pharmacy education. Through the Residency program, pharmacists gain higher level practice skills leading to specialization beyond the basic Pharm.D. professional degree.
- The School began accepting applications and enrolled its first Pharm.D. class of 63 students in the fall of 1996. The founding class graduated in May 2000. Over the course of its history, the School has conferred 1,064 Pharm.D. degrees. In addition, 233 residents have completed the Pharmacy Residency program, and 57 students were awarded graduate M.S. or Ph.D. degrees in Pharmaceutical Sciences from the Graduate School of Biomedical Sciences.
- The School's vision statement reflects the changing responsibilities of the pharmacist and the role of the educator in that process. The School is learner-centered, collegial in nature, and uses state-of-the-art technology to cultivate practitioners dedicated to providing a high standard of care for their patients. The curriculum is built around a problem-based learning model and provides a stimulating and innovative cooperative educational environment.
- Due to the generous support of the Abilene Community Partners, the School opened a new campus in Abilene in fall 2007. The campus, made possible from a \$15.6M gift to the University, includes all four (4) years of the program. There are 26 FTE faculty members, 11 staff members, and four (4) residents in Abilene to serve 160 students annually.
- The School's Dallas/Fort Worth campus is located at the Dallas Medical Center with a second building at the North Texas Veterans Affairs Medical Center, for a total of 18,000 sq. ft. in the two facilities. An additional 4,100 sq. ft. was leased at the Dallas Medical Center during the summer of 2012 to accommodate another 36 P3 and P4 students. The locations of each facility – the Dallas Medical Center campus being located near the University of Texas Southwestern Medical Center, Parkland Memorial Hospital, and Dallas Children's Medical Center, and the second building being located adjacent to the VA's clinic building - have proven to be an exceptional affiliation for the Pharm.D. and residency programs.
- The School is committed to providing West Texas and the Dallas/Fort Worth Metroplex with innovative pharmaceutical care. The faculty and pharmacy residents provide patient care through various contracts with external healthcare institutions including hospitals, community pharmacies, nursing homes, clinics, and the Texas Department of Criminal Justice.
- The School manages two pharmacies. Developed as model teaching pharmaceutical care pharmacies in Texas Tech clinics, these pharmacies emphasize comprehensive pharmaceutical care. The pharmacies are located in Amarillo (Amarillo Pharmaceutical Care Center) and in Lubbock (TTUHSC Pharmacy-main campus).

- The School manages and operates the Texas Panhandle Poison Center (TPPC). The TPPC serves 71 counties that cover the Amarillo, Lubbock, Wichita Falls and Abilene health marketing areas. For FY 2012, the total call volume for the TPPC was 26,604 calls received from throughout their coverage area.
- In addition to its direct patient care initiatives, the School supports a significant research program. The SOP building in Amarillo houses approximately 14,000 sq. ft. of laboratory space. The SOP also has wet research lab areas in the new Amarillo Research Building (14,500 sq. ft.), the Abilene SOP building (3,000 sq. ft.), and in Dallas at the Southwest Professional Building (1,900 sq. ft.). A new 11,900 sq. ft. research addition is being constructed for the SOP Abilene Campus funded by a grant from the Dodge-Jones Foundation. The School across its campuses supports four research centers focused on 1) cancer biology, 2) clinical pharmacology and experimental therapeutics, 3) blood-brain barrier research, and 4) immunotherapy and biotechnology.
- The SOP receives significant external research grant and contract funding. Annual extramural grant funding to the School for FY 2012 exceeded \$7.7 million with 14 grants from the National Institutes of Health (NIH) and four grants from the Cancer Prevention and Research Institute of Texas (CPRIT). Overall research expenditures by the School exceeded \$10.4 million during the same period from all sources.
- The School also maintains a robust scientific program including the annual Marsh Lectureship which brings world-renowned research experts to the Amarillo campus to give lectures on neuroscience and addiction. Each year the School convenes a research retreat named Research Days to bring together faculty, residents, staff and students to discuss research progress over the previous year and to foster future collaborations on new projects and initiatives.

CORRECTIONAL MANAGED HEALTH CARE (CMHC)

During the 1993 Legislative session, the Texas Legislature established a Correctional Managed Health Care Advisory Committee (CMHCAC) and charged it with developing a managed health care delivery system to provide health care to Texas Department of Criminal Justice (TDCJ) offenders. The Committee established a contract with TTUHSC to provide health care for the TDCJ facilities in the western part of the state. Of the approximately 152,000 offenders housed in TDCJ facilities, the western sector has approximately 32,000 beds in 31 facilities at 18 sites. Included is a 550-bed psychiatric hospital located in Lubbock, which opened in July 1995. A regional medical/surgical prison facility, adjacent to the psychiatric hospital, opened September 1996 with medical/surgical care provided by the TTUHSC School of Medicine. This facility was expanded by 44 beds in 2006, yielding a total of 88 medical/surgical and emergent care beds. TTUHSC is responsible for providing ambulatory care at the TDCJ facilities, developing Preferred Provider Networks, providing long term care, and operating a telemedicine program. In addition, TTUHSC is responsible for contracting with local community hospitals and staffing new facilities. All facilities are accredited by the American Correctional Association.

Psychiatry support for TDCJ was moved to TTUHSC on January 1, 1996, with TTUHSC providing the mental health care in West Texas. In addition, TTUHSC has the only Program for the Aggressively Mentally Ill Offender (PAMIO) in the state. This program has received national recognition for the innovative approaches to these challenging patients. Pharmacy services for the TDCJ contract are provided through a central contract managed in cooperation with the TTUHSC School of Pharmacy in Amarillo.

During the 1999 Legislative Session, the Committee was renamed the Correctional Managed Health Care Committee (CMHCC), and in 2011, funding shortfalls resulted in the legislative decision for TTUHSC CMHC to contract directly with TDCJ for offender health care services. Although CMHC continues to operate all of its prison health clinics, reduced funding has necessitated reduced hours and staff at several facilities.

The role of the correctional telemedicine program is to provide specialty consults for the TDCJ offenders by connecting correctional facility clinics with medical school and Montford Complex consultants in Lubbock. It reduces backlog in needed specialty clinics and initiates a referral pattern to the TTUHSC specialists. The telemedicine program has also been a public safety tool by reducing the need to transport offenders from prisons to receive specialty care. The correctional telemedicine system is located in 15 of the 31 TDCJ prison units served by TTUHSC. With deployment of telemedicine in the larger facilities and at sites with multiple prison units, 92% of the offenders served by TTUHSC have telemedicine access.

CMHC staff uses a “state-of-the-art” electronic medical record (EMR) system, customized for correctional use. This EMR design supports discrete data capture at the point of care, accommodates complex consultations, provides all users with an offender’s medical history, and facilitates a long-sought need for connectivity and standardization. CMHC also uses a pharmacy interface called Pharmacy Replacement System (PRS) that includes electronic physician order entry. The PRS/EMR interface transfers medication ordering information, in real time, from any location to the centralized state pharmacy such that medication orders are delivered within 24 hours.

F. MARIE HALL INSTITUTE FOR RURAL AND COMMUNITY HEALTH

VISION: The F. Marie Hall Institute for Rural and Community Health will be nationally recognized and respected for excellence.

MISSION: The F. Marie Hall Institute for Rural and Community Health exists to work in collaboration with the people of West Texas for the advancement of health through imaginative and scholarly research, innovative use of technology, comprehensive education and outreach.

The F. Marie Hall Institute for Rural and Community Health at TTUHSC was established in February 2006 with a generous donation from Ms. Hall to expand the impact of TTUHSC in addressing the needs of the region and developing solutions that affect rural health beyond the bounds of West Texas. The Institute is a multidisciplinary group of professionals that are focused on key programs in four major areas:

West Texas Area Health Education Center: The West Texas AHEC program and its five regional centers serve as the Institute's outreach arm to engage communities in assessing their healthcare needs and to coordinate the pipeline of the healthcare workforce for the region. The West Texas AHEC facilitates a comprehensive longitudinal pipeline of activities to support future healthcare workforce development as well as existing rural health providers in the western half of the state. The core programmatic areas and FY 2012 highlights are:

- Create a pipeline for healthcare workforce development - inform, encourage and prepare rural and underserved youth to pursue health professions education.
 - Reached 40,848 one-touch participants in 252 events.
 - Provided longitudinal activities (over 20 hours of contact) to 303 participants for a total of 10,199 contact and volunteer hours.
 - Released the 5.1 Edition of Texas H.O.T. Jobs materials, the only comprehensive resource about health care opportunities for career seekers in the state. (www.texashotjobs.org)
- Expand and optimize community-based clinical training resources, which is critical to meeting current and future needs of the state. Community-based clinical training provides real, direct benefit to training programs, to local communities, and to students themselves.
 - Placed students in 406 rotations in medicine, nursing and other primary care fields, providing 89,510 clinical hours of training.
 - Produced a total economic impact in rural West Texas of over ten million dollars.
- Facilitate community health education to assist communities in addressing priority health needs.
 - 7,999 health professionals received continuing education in or near their communities.
 - Completed 111 community health assessments within the TTUHSC and AHEC catchment area.

Rural Health Research Group: The core program of the Rural Health Research Group is Project FRONTIER, which uses community-based participatory research approaches to focus on rurality and disease. It is the largest rural community-based cohort study in Texas.

- Project FRONTIER: (Facing Rural Obstacles to healthcare Now Through Intervention, Education & Research)
 - Project FRONTIER is a longitudinal study of rurality and disease in rural West Texas which initially focused on cardiovascular risks and cognition and depression, but has been expanded to include rural cardiovascular health interventions related to the Million Heart Campaign, diabetes and obesity, community mental health issues, especially suicide prevention, and environmental exposures.
 - Over 900 participants enrolled into the study currently (56% Mexican American)
 - Current infrastructure will allow evaluations for up to 600 individuals per year, which will include new and follow-up evaluations.

- Research Training Platform:
 - The Research Group provides research training opportunities at all levels, and has provided research collaborative and mentorship opportunities to faculty, residents, fellows, as well as students. Over 1,000 hours of graduate training and 500 hours of undergraduate have been provided with the hopes of fostering the next generation of scientists studying health issues faced by West Texas residents.

Telemedicine: Telemedicine electronically transports primary and specialty medical care into the remote areas of West Texas, serving people and communities that are located hours from medical services. Telemedicine provides better access to high-quality medical expertise, at lower costs and with better population health outcomes in the sparsely populated region of Texas.

- Community Telemedicine - This program features telemedicine support for youth and school-based health care facilities along with seven rural health clinics and outpatient care facilities that serve communities located around the 108 western-most counties of Texas. This is coordinated through hub sites at each TTUHSC regional campus.
- Specialty Care – Below are examples of specialty care services most frequently supported by the Telemedicine Program:
 - *Burn Care Clinic* – With the only Level 1 Burn Trauma Unit between Dallas and Phoenix, the telemedicine operation provides a mechanism for follow-up of burn patients, especially from El Paso and Eastern New Mexico.
 - *El Paso Pediatric Dermatology* – The burn aftercare program serves Medicaid patients in El Paso. In addition, pediatric patients and a growing number of adult patients can be seen in their community rather than having to travel the 700-mile round trip to the nearest dermatologists that practice in Lubbock.
 - *HIV Clinic* – The infectious disease care program works with Big Country AIDS Resources and Medical Care Mission in Abilene to provide access to infectious disease physicians for patient care and disease control programs.
 - *Advancing Telemedicine in West Texas* – Other specialty service programs are available at TTUHSC regional campuses in Pediatric Endocrinology (Lubbock), Pediatric Nephrology (Amarillo), Pediatric Psychiatry (Lubbock), and Trauma Care (Odessa).
- Correctional Telemedicine – This program covers services for Psychiatry, Psychology, Dermatology, Orthopedics and Urology for inmates in the TDCJ prison units in West Texas. This program results in better care, and is safer for health care providers and inmates than physical transport programs, and fulfills court-ordered health coverage for the incarcerated population of West Texas.
- TexLa Telehealth Resource Center – This Center is one of 12 such nationally networked resource centers to assist in the adoption, use and integration of TeleHealth and Telemedicine services into health care delivery. It is funded by an HRSA grant from the Office of the Advancement of Telehealth.

- Partnership between TTUHSC and LSUHSC provides technical assistance to health care organizations, health care networks, and health care providers in the implementation of cost-effective telehealth programs to serve rural and medically underserved areas and populations.

West Texas Health Information Technology Regional Extension Center: The WTxHITREC is chartered to assist providers in adopting and achieving meaningful use of electronic health record technology. Through its consultative services to providers, the WTxHITREC is accelerating the adoption and implementation of electronic health records (EHRs) across West Texas. Key elements and benefits of the work of the WTxHITREC are:

- Through the use of EHRs, the delivery of health care services becomes more seamless. EHRs provide many benefits to providers and patients alike. Reminders to patients for appointments and preventative care measures, timely access to test results via patient/physician portals, clinical information exchange to support referrals, data capture reducing the need for repeated questions and answers, are but a few improvements gained through EHRs.
- Through technology fueled by innovation, the WTxHITREC is assisting health care providers in achieving the meaningful use of EHRs across our region. With commitment, determination and innovation, West Texas is poised to be a national model for providing quality care across a great expanse and “shrinks the distances” between providers by sharing health information data through the use of electronic health records.

Additional information on the programs of the F. Marie Hall Institute for Rural and Community Health can be found at <http://www.ttuhsu.edu/ruralhealth>.

INFORMATION TECHNOLOGY

TTUHSC uses a wide range of information systems technologies to support its academic, clinical, research and service missions. The services provided by the Information Technology (IT) Division have enabled the institution to establish an integrated network that connects TTUHSC’s campuses and clinics together as a system, and extends the institution’s outreach to communities in need. The Division is comprised of the Office of the Chief Information Officer (CIO), Technology Services, Information Services, TechLink, Health.edu, and Security. The Technology Services and Information Services departments provide the institution with technology enabled services in the areas of PC support, server administration, data center operations, networking, programming support, data management, systems management, video conferencing, project management, and scheduling of technology resources. The scope of services includes:

- ▶ Providing and supporting a wide area data network that supports all campuses and outlying clinics;
- ▶ Providing and supporting a high-speed ATM or Gigabit Ethernet network infrastructure between all campus locations;

- ▶ Providing institutional support for over 10,500 computers across all campuses through telephone support and actual hands-on repair and replacement of both hardware and software;
- ▶ Providing access to computer-based training on software programs and other technologies for students, faculty and staff;
- ▶ Providing and supporting institutional data file storage, printing services, and e-mail services;
- ▶ Providing essential backup services of institutional data;
- ▶ Hosting (physical and virtual) and providing support, maintenance and backup of departmental servers;
- ▶ Providing the institution with electronic security protection from outside intrusions and computer virus attacks;
- ▶ Providing appropriate project management guidelines for all institutional information resource projects;
- ▶ Providing and supporting Internet connectivity, including wired and wireless network connectivity on-site at each campus, and remote Virtual Private Networking (VPN);
- ▶ Providing, designing and supporting web and other application development for academic and clinical information;
- ▶ Providing video teleconferencing networks and services for distance learning, telemedicine and other institutional applications; and
- ▶ Providing and operating a multi-campus resource reservation system for the management and scheduling of multiple-use video teleconferencing facilities.

- **Digital Network**

The existing digital network infrastructure consists of a 2 to 4 Gigabit Ethernet campus LAN environment with core speeds of 10 gigabits (10,000 megabits per second), and WAN connectivity of ATM OC-3 (155 megabits per second) or Gigaman (1,000 megabits per second) to each regional campus. The core infrastructure equipment that supports the primary institutional servers operates at 10 Gigabit transmission speeds. Network connectivity for faculty, staff and students is available at 10/100/1,000 megabits to the desktop. Data connectivity is provided for students in TTUHSC's labs, classrooms, study areas, student center and libraries. Faculty, staff and students also have secure wireless access to network resources throughout all campuses. Access to information resources exists through Texas Tech University's access to Internet 2. Additional collaboration with the general academic university is available through shared Student Information and Administrative Systems. Some of the shared administration systems include financial accounting, personnel and payroll systems. Search engines for each campus cover information on web pages for both TTU and TTUHSC.

- **Information Systems**

The Information Technology Division provides file services, web-based reference material, interactive video teleconferencing for distance learning and telemedicine (TechLink and Healthcare Services network), discussion forums, and electronic mail – all used by the Schools to support their educational programs. Application and web programming support, as well as data management services are also provided to support academic, clinical and research efforts. An automated resource reservation tool optimizes the scheduling of video teleconferencing resources to support the delivery of educational programs and healthcare services. Students also use network file servers and other services (i.e., student web server, SharePoint, etc.) to store and access peer tutoring and other educational materials compiled by students. Education is supported and enhanced through the institutional learning management system.

Education is further supported through Internet availability for library resources, web-based materials, e-mail, and other information technology resources required for enhancing the educational experience. These web-based services are provided so educational material can be made available for student use. Web-based services are also used to distribute general announcements or information to faculty, staff and students. All faculty and students are assigned e-mail addresses so that faculty-to-student, student-to-faculty, and student-to-student communication is supported. Additionally, online training is provided 24/7 for faculty, students and staff, with over 300 IT, personal enrichment, and professional develop courses.

- **Educational Support: TechLink**

The TechLink network connects 46 distance learning classrooms and 38 conference rooms on all campuses. Using state-of-the-art compressed high definition digital video and audio technology, the network provides live, interactive video teleconferencing capability among all campuses for research, administrative, teaching, and other educational support activities. Carrying over 22,400 event hours in FY 2012, the network:

- Maximizes the outreach and impact of limited faculty resources;
- Provides quality undergraduate and graduate courses to students on all campuses;
- Facilitates curriculum consistency and continuity; and
- Reduces faculty and student travel among the campuses.

The network also features a video teleconferencing portal for connecting TTUHSC classrooms and conference rooms on the TechLink network to those of other institutions such as medical centers and universities. This enables TTUHSC faculty, staff and students to collaborate with colleagues at other locations on a wide variety of academic, business and healthcare matters, reducing the need for frequent travel.

- **Healthcare Services**

The Healthcare Services network utilizes compressed digital video and audio transmitted via terrestrial circuits to provide Texans with direct patient care and information. The Healthcare Services network includes more than 30 campuses, rural and correctional sites. These facilities support telemedicine activities through live, interactive video consultations between medical specialists at all campuses of TTUHSC, in addition to Primary Care Physicians, Physician Assistants, Nurse Practitioners and their patients in West Texas and the State's correctional facilities. The network facilitates full motion picture quality video interactions among all parties and the transmission of critical patient information including electronic medical records, diagnostic data and images. A video teleconferencing portal is available to the Healthcare Services network, enabling healthcare providers in West Texas to enhance their services by consulting with colleagues at medical facilities outside the TTUHSC system on a variety of healthcare and related matters. The practice of medicine through telecommunications technologies has increased access to quality healthcare in State correctional facilities and underserved rural communities. The availability of telemedicine and related services plays a vital role in enabling the rural community infrastructure to remain viable and healthy.

- **Health.edu**

Health.edu is a multi-format continuing education and in-service training provider. Health.edu is supported by a comprehensive online learning management system, and is used to extend the resources of healthcare facilities and professionals working in diverse healthcare areas. Over 220 hours of new continuing education and training programs are delivered to healthcare professionals and hospital staff annually in a variety of media formats. Continuing education programs are delivered via Health.edu to physicians, nurses, allied health professionals, and facility staff at more than 200 hospitals and clinics in all regions of Texas, including 79 Critical Access Hospitals. The services are provided at no cost to these essential community resources under a partnership developed with the Office of Rural and Community Health. In addition to the facilities in Texas, Health.edu provides education services to over 400 hospitals, civilian and military, throughout the United States. Extended accreditation periods and multiple cross-accreditation programming have increased the approved hours for healthcare professional disciplines to over 670 hours per year. Expanded programming, such as safety and patient and community education, has significantly added quality and value to the services offered to all healthcare staff and their community. Health.edu issues more than 900,000 contact hours and awards over 785,000 CE certificates per year. The use of Health.edu has reduced professional isolation and has enabled rural practitioners to assimilate expert developments in their respective fields and to maximize the time they can devote to direct patient care.

- **Information Technology Security**

The technology infrastructure and systems require a high level of security to protect sensitive and confidential information. The Information Technology Division ensures that security measures and best practices are followed to provide maximum protection for critical and confidential information. Training, software, hardware, and staff support provide the critical components necessary for the security of institutional information assets.

- **Information Technology Project Management Office**

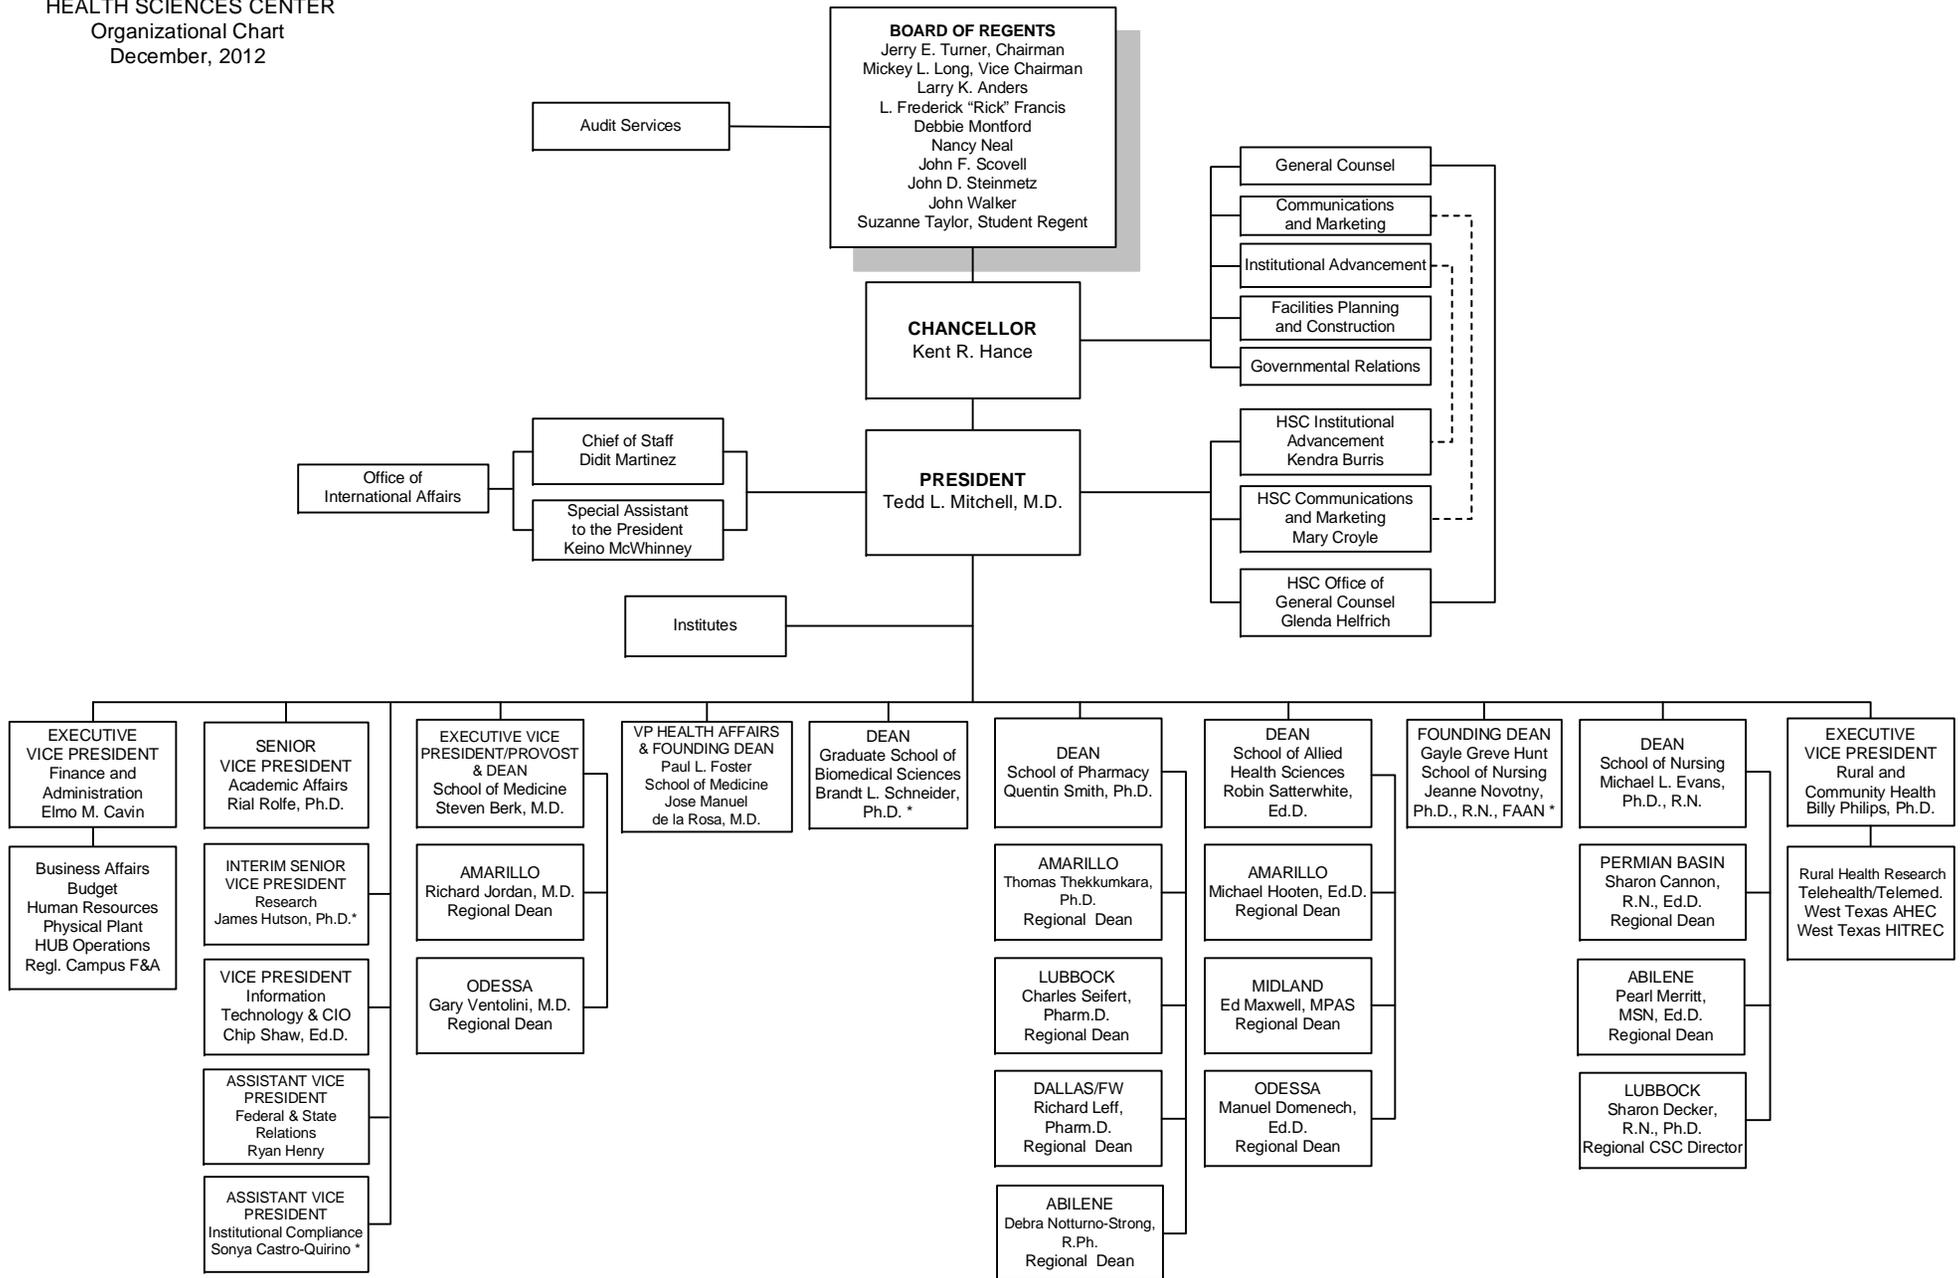

Policies and procedures for managing information resource projects at Texas institutions of higher education must conform to the Texas Administrative Code (TAC), Title 1, Part 10, Chapter 216. At TTUHSC, the Information Technology Project Management Office (ITPMO) has established a TAC compliant process based on the Texas Project Delivery Framework and other widely accepted methodologies, including the Project Management Body of Knowledge (PMBOK), a global standard. Within this process, a governance group assigns each project to one of five levels based on complexity and risk, establishing the degree of formal project management procedures to be applied. From the information gathered during project definition, project priority is determined and the necessary IT resources are assigned. The ITPMO monitors each phase of project implementation, reporting progress, issues and trends to the CIO, and ensuring compliance with applicable project management practices. Project management policies and procedures are reviewed at least annually, ensuring continuous process improvement and verifying compliance with institutional, state and federal legislation and mandates.

LIBRARIES OF THE HEALTH SCIENCES

The Libraries of the Health Sciences, founded in 1971, exist to meet the curricular, research and patient care information needs of the students, faculty and staff of TTUHSC at the Lubbock, Amarillo, El Paso and Odessa campuses. By extension, the libraries also exist to meet the information needs of the larger biomedical and health care community of the 108-county West Texas service area of TTUHSC. The libraries, one at each of four campuses (plus a second at El Paso), are staffed by 21 professional librarians, two administrative staff, and 27 support staff. Professional librarians hold academic appointments in the School of Medicine's Health Communications Department and teach a variety of information management and computer courses to students of all degree programs within TTUHSC. The libraries are fully computerized and share a common online catalog, as well as a variety of electronic databases. TTUHSC library users currently have access to 25,645 electronic journals, 48,437 electronic books, and 599 electronic databases. Through a proxy server, users may access this material from off-site locations as well. All TTUHSC libraries have an electronic virtual reference librarian system to assist in the delivery of services to distance education students. The libraries currently have over 25 external contracts and service agreements in place throughout the urban and rural areas of West Texas, in order to provide biomedical information support to unaffiliated health care-related entities. In the fall of 1997, the three remote campus libraries at Amarillo, Odessa and El Paso added a significant number of hours of operation (nights and weekends) to expand opportunities for service to users. The Lubbock library hours are currently 105 per week, while the mean average of hours of operation for the 125 medical school libraries in the U.S. and Canada is 98. In the summer of 1998, the Lubbock library (Preston Smith Library of the Health Sciences) moved to a new 50,000 sq. ft. facility. It features 31 group study rooms for use by students, a 60-workstation computer lab, and adequate space to consolidate all library collections in one location. The library is equipped with 14 additional public access computers as well. The need for remote storage of resource material was thereby eliminated. In the summer of 2008, the El Paso Library was named the Delia Montes-Gallo Library of the Health Sciences, and in the fall of 2008, that library opened a new 6,000 sq. ft. additional library on the new El Paso campus. In 2006, as a result of local community involvement and fundraising activity, the Permian Basin/Odessa campus library added a 16-station computer laboratory within its existing space. In 2011, the number of answered reference questions at the libraries was 27,581 while the mean average of answered questions for the 125 medical school libraries in the U.S. and Canada is only 9,281. During the most recent SACS (Southern Association of Colleges and Schools) accreditation visit, the TTUHSC libraries were commended by SACS for their services to students on campus and at distance, and the libraries were also commended by LCME (Liaison Committee on Medical Education) year before last. In terms of collections, the TTUHSC libraries have more physical volumes than any other medical school in Texas. In 2010-2011, total expenditures on personnel, collections, and recurring capital were \$5,621,770, while the national mean was \$3,716,530.

NOTES:

1. The breakout above includes the distribution of Academic Administrators (Deans) in their respective locations, although Academic Administrators are actually counted as staff group (02) in the President's Division in the Affirmative Action Plan (AAP). There are 23 Academic Administrators (Deans) in Fall, 2012.
2. CMHC staff are included in either Amarillo and Lubbock totals due to the organization's administrative structure, although the actual work locations of these staff vary.
3. Employees attached to the Texas Tech University System are counted in that section of TTU's Affirmative Action Plan and are not reflected in the above totals.

SOURCE: Fall 2012 figures were taken from the October 05, 2012 Employee CAAM's report.

***LIBRARIES OF THE HEALTH SCIENCES CENTER
E-RESOURCE STATISTICS***

E-resources form a major component of our acquisitions for all health sciences libraries. Inasmuch as they fit the definition for library resources as capitalized items as set forth in the SPA Process User's Guide I.4, we are reporting them in this report. Since they are all electronic items for use throughout the TTUHSC system, they are not rationalized to specific campuses, but rather are reported for all sites.

	Fall 2009		Fall 2010		Fall 2011		Fall 2012	
E-books	42,778	\$70,452.25	42,152	\$149,047.90	48,437	\$228,315.00	50,439	\$352,811.00
