

TEXAS TECH UNIVERSITY HEALTH SCIENCES CENTER

FACT BOOK

20th Edition

December, 2013
Prepared by the Office of the
Executive Vice President for Finance & Administration

PREFACE

The Office of the Executive Vice President for Finance & Administration is pleased to provide Texas Tech University Health Sciences Center with a Fact Book. This edition is the 20th annual issue produced by this office as a service to TTUHSC.

We offer this Fact Book as a means of providing a common set of data which will be readily available to decision-makers throughout the Health Sciences Center. We hope that the Fact Book will also aid in achieving the institution's goal of providing the highest standard of excellence in higher education while pursuing continuous quality improvement, stimulating the greatest degree of meaningful research, and supporting faculty and staff in satisfying those whom we serve.

This Fact Book can be accessed on-line at the TTUHSC home page at <http://www.ttuhs.edu/hsc/factbook/>.

We encourage and invite comments, reactions, suggestions, and corrections as a means of improving future issues.

Statement of Accreditation

Texas Tech University Health Sciences Center is accredited by the Southern Association of Colleges and Schools Commission on Colleges to award bachelor's, master's, doctoral, and professional degrees. Contact the Commission on Colleges at 1866 Southern Lane, Decatur, Georgia 30033-4097, or call 404-679-4500 with questions about the accreditation status of Texas Tech University Health Sciences Center.

MISSION AND VISION STATEMENTS

MISSION STATEMENT

The mission of Texas Tech University Health Sciences Center is to improve the health of people by providing high quality educational opportunities to students and health care professionals, advancing knowledge through scholarship and research, and providing patient care and service.

VISION STATEMENT

Texas Tech University Health Sciences Center will become a nationally recognized health sciences university.

-  Correctional Health Care Unit (31)*
-  With Telemed (16)

* Allred, Clements, Montford, Neal, Roach and Smith units have multiple facilities colocated (number identified on map)

TEXAS TECH UNIVERSITY HEALTH SCIENCES CENTER

History

The Texas Tech University School of Medicine was created by the 61st Texas Legislature in May, 1969 as a multi-campus institution with Lubbock as the administrative center, and with regional campuses at Amarillo, El Paso, and Odessa. In 1979, the charter was expanded to become the Texas Tech University Health Sciences Center (TTUHSC), leading the way for establishment of the Schools of Nursing and Allied Health Sciences, and the Graduate School of Biomedical Sciences. In 1993, the legislature authorized the establishment of a School of Pharmacy to be located in Amarillo. In addition, Allied Health Sciences programs were expanded to Amarillo and the Permian Basin. In 2003, the legislature authorized the establishment of a four-year medical school in El Paso, and in 2011, the Gayle Greve Hunt School of Nursing was established, also located in El Paso. The seven schools are committed to regionalized, multi-campus educational experiences, and to the related biomedical research, graduate studies, patient care and community service required of a health sciences center. A primary effort is made to achieve a balanced group of students with qualified minority students, diverse age groups, and heterogeneous backgrounds in educational and life experiences. A special effort is made to recruit applicants from West Texas and from rural and border communities.

The Health Sciences Center has as its major objectives the provision of quality education and the development of academic, research, patient care, and community service programs to meet the health care needs of the 108 counties of West Texas, which comprise 50% of the land mass and 11% of the population of the total state. This 131,000 square mile service area and population of 2.7 million has been, and remains highly underserved by health professionals and accessible health care facilities, despite the substantial and meaningful contribution made by our institution. Demographic shifts in West Texas populations, as well as socioeconomic and epidemiologic characteristics of its sub-groups, create major and specific demands for service. While education of students and residents remains the primary focus of the institution, there has been an important impact on the health status of West Texas. The lack of a single locus of population density has resulted in the regionalization of medical and health care education and patient care on multiple geographically separated campuses. In providing an excellent quality undergraduate, graduate, and continuing health professional education at each site, the health needs of the larger community have been better met and relevant indices of health status demonstrate significant improvement.

The growing evidence confirms that the School of Medicine, which celebrated its 40-year anniversary in 2009, is accomplishing its mission of educating and placing practicing physicians in West Texas. With increasing demand for medical education, primarily along the Texas/Mexico border, legislation was signed in October 2003 establishing a new four-year medical school in El Paso. The school was accredited in February 2008, and welcomed its inaugural class in July 2009. It was renamed the Paul L. Foster School of Medicine in 2009. The Schools of Nursing and Allied Health Sciences continue their impact on the health care needs of West Texas, with most of their graduates remaining in West Texas to pursue their chosen profession. The School of Nursing celebrated its 30th anniversary in October 2011. Upon approval by the Texas Higher Education Coordinating Board and the Texas Board of Nursing, the Gayle Greve Hunt School of Nursing officially opened as a free-standing school of nursing in September 2011. The School of Pharmacy celebrated a decade of excellence in August 2006. The school's expansion continues with the establishment of a four-year program at a new campus in Abilene, which began classes in August 2007.

TTUHSC is a component of the Texas Tech University System. The President of TTUHSC reports to the Chancellor, who is the Chief Executive Officer of the System. The Chancellor and the President are responsible to the TTUS Board of Regents, which sets overall policy for TTUS, Texas Tech University, TTUHSC, and Angelo State University. The current members of the Board of Regents are as follows:

<u>Regent</u>	<u>Term Ends</u>	<u>Hometown</u>
Larry K. Anders, Vice Chair	Jan. 31, 2017	Dallas
John Esparza	Jan. 31, 2019	Austin
L. Frederick “Rick” Francis	Jan. 31, 2019	El Paso
Joshua Heimbecker, Student Regent	May 31, 2014	San Angelo
Tim Lancaster	Jan. 31, 2019	Abilene
Mickey L. Long, Chair	Jan. 31, 2015	Midland
Debbie Montford	Jan. 31, 2017	San Antonio
Nancy Neal	Jan. 31, 2015	Lubbock
John D. Steinmetz	Jan. 31, 2017	Lubbock
John Walker	Jan. 31, 2015	Houston

The Deans of the School of Medicine, School of Nursing, School of Allied Health Sciences, School of Pharmacy, the Graduate School of Biomedical Sciences, the Paul L. Foster School of Medicine, and the Gayle Greve Hunt School of Nursing report to the President as Chief Executive Officer of TTUHSC. Administrative governance and authority of the medical school is situated in Lubbock, and the Dean, as Chief Academic Officer, is fully responsible for the conduct and maintenance of quality educational experiences and related academic and clinical programs offered by the campuses at Amarillo and Odessa. The Regional Deans of Medicine at Amarillo and Odessa are responsible to the Dean of the School of Medicine in Lubbock for academic programs enabling the Dean to maintain quality assurance in the academic program. The School of Nursing and the School of Allied Health Sciences utilize the same administrative model. Regional Deans of Allied Health Sciences in Amarillo and Odessa, and the Regional Deans of Nursing in Odessa and Abilene, report directly to their respective Deans in Lubbock. The Dean of Pharmacy is located in Amarillo, with Regional Deans being located in Lubbock, Dallas, and Abilene reporting to the Dean in Amarillo. The Founding Dean of the Paul L. Foster School of Medicine and the Founding Dean of the Gayle Greve Hunt School of Nursing, both located in El Paso, have no Regional Deans reporting to them. This regional concept allows the Schools to establish and operate student education programs, physician residency training programs, continuing education programs, and outreach programs that have proven to be a vital factor in the placement of graduates in practice sites in West Texas, and to support the practice of medicine, nursing, and allied health sciences in this vast area.

In 2008, TTUHSC adopted the Institutional Compliance Program (ICP). The Office of Institutional Compliance is responsible for implementing the ICP by advancing an institutional culture of ethics, integrity and compliance with laws, regulations and policies at TTUHSC. This is accomplished through awareness programs (such as policies and training), monitoring activity and response to reports of non-compliance. There are various reporting mechanisms available to members of the TTUHSC community to confidentially report concerns of regulatory non-compliance, including the anonymous TTUS Compliance Hotline. Reported concerns are investigated and corrective action is implemented to address any identified non-compliant activity.

The Institutional Compliance Officer reports to the President, and chairs the Institutional Compliance Committee and Institutional Compliance Working Committee. This individual also has primary oversight of the TTUHSC Billing Compliance Program and HIPAA Privacy, and serves as a resource for other TTUHSC areas that have regulatory oversight responsibilities. Each SOM regional campus has a Billing Compliance Director who reports directly to the Institutional Compliance Officer. The Institutional Privacy Officer reports to the Institutional Compliance Officer and serves as the primary privacy official for the institution, supervising Regional Privacy Officers at the El Paso, Amarillo, and Permian Basin campuses.

An institutional philosophy that further supports quality services to the students, patients, faculty and staff was enhanced in 1990. The thrust of the initiative is three-fold: provide customer service skills training to employees, assist departments in quality improvement efforts, and recognize individuals and teams for excellence in quality service. The initiative is called *SERVICEplus*. The customer awareness program of *SERVICEplus* helps employees identify who they serve and to understand and exceed the needs and expectations of these constituents.

The Office of HSC Relations coordinates an annual quality service recognition program for staff employees. This prestigious award recognizes staff employees who have been continuously employed at Texas Tech in a benefits-eligible position for at least two years, who have completed the *SERVICEplus* educational program, and who demonstrate excellence in service. Two levels of awards exist: the Quality Service Award and the Chancellor's Award of Excellence, whereby honorees receive a plaque, certificate, and a monetary award ranging from \$500 to \$1,500.

The Health Sciences Center is continually striving to make the institution and its programs the most cost effective possible, which has been particularly important as the institution has been growing and developing its programs. In 1985, general revenue made up more than 50% of the total operating budget of the Health Sciences Center. Now, in fiscal year 2014, general revenue is 23.9% of the total budget. Even though the Health Sciences Center has been able to sustain the growth of its schools and programs, adequate levels of state appropriated funds are essential to accomplish the central mission of providing health care education of the highest quality.

The Health Sciences Center is proud of the accomplishments that have been achieved by this institution. Some of these include:

SCHOOL OF MEDICINE

- Over the past five years, approximately 57% of graduates have remained in Texas to complete residency training, and an average of 16% of School of Medicine graduates have remained in a TTUHSC program for residency training.
- Over 20% percent of the practicing physicians in West Texas are TTUHSC medical school and/or residency graduates.

- Over the past five years, an average of 46% of all medical school graduates have elected to enter the primary care specialties of Family Medicine, Internal Medicine, Obstetrics and Gynecology, and Pediatrics. In 2013, 54% of graduates elected primary care specialties.
- Each of the TTUHSC campuses has been shown to place the majority of its program graduates who stay in West Texas within a 75-mile radius of the campus. The regional campus system has a positive impact on the geographic distribution of physicians throughout West Texas. In 1969, there was one physician for every 1,300 residents in the region, and today this ratio has decreased to nearly one doctor for every 750 residents.
- In recent years, the School of Medicine has combined efforts with Texas Tech University to offer joint academic programs addressing the growing needs of practicing physicians. In the summer of 1998, a venture began with the Rawls College of Business Administration providing the ability to obtain both MD and MBA degrees. To date, 106 students have completed this program. Most recently, a joint JD and MD program to be offered in collaboration with the TTU School of Law began in the fall of 2009 where students interested in future careers focusing on health care policy, bioterrorism, and medical law can receive both degrees.
- The campuses of the Schools of Medicine operate 28 individually accredited residency programs and 17 fellowship programs in West Texas. As of October, 2013, these programs had 645 total residents in training, which includes 50 fellows, of which 382 (59.2%) were in primary care fields of Family Practice, Internal Medicine, OB/GYN and Pediatrics. Of the 382 total primary care residents in training, 91 are specifically in Family Practice. The 45 residency and fellowship programs have 183 first year trainees, and will graduate approximately 194 residents and fellows in 2014.
- The four campuses operate a total of 29 clinical departmental units and numerous clinical services and education programs which were previously unavailable in the West Texas region. A partial list of specialty services includes: care for women and infants, including perinatal care and neonatal intensive care (four campuses), pediatric subspecialty services and intensive care (four campuses), trauma centers and emergency medicine (two campuses), neurology and neuroscience centers (two campuses), a center for pain treatment and research, a regional burn center, a center for Alzheimer's disease, a cancer center and a program for bone marrow transplantation, and a border community breast care program.
- The patient care programs of the School of Medicine serve as the base for clinical education of medical students and residents, the base for clinical research and as a major source of care for citizens of West Texas. In fiscal year 2013, the School of Medicine and Paul L. Foster School of Medicine provided 652,976 clinical visits of care and served 293,684 patients. The Schools also served 62,246 inpatients in its affiliated hospitals, and provided a total of \$77,097,273 in uncompensated care.

PAUL L. FOSTER SCHOOL OF MEDICINE

In 1998, TTUHSC at El Paso celebrated 25 years serving the El Paso community. The following year, then-Texas Tech System Chancellor John T. Montford shared with the Board of Regents a vision for a full-fledged four-year medical school in El Paso to help alleviate a severe shortage of physicians in the area. Currently, there are less than 110 physicians for every 100,000 people in El Paso. The national average is 198 physicians per 100,000 patients. The Texas average is only 150 per 100,000. Studies have shown that most medical students remain in the region in which they received their education to establish their practices. The addition of the first two years of the medical school would allow students from El Paso and nearby regions to complete their education near home, in hopes of retaining doctors in the area.

- In 2001, longtime community philanthropists J.O. and Marlene Stewart donated 10.2 acres of land near the HSC for the new medical campus. The Paso del Norte Foundation approved a \$1.25 million scholarship grant program for local students contingent on the approval of the four-year medical school.
- During the 2001 Texas Legislative Session (77th), the El Paso legislative delegation successfully spearheaded an effort to secure \$40 million in tuition revenue bonds for the research facility, one of three buildings on the new campus, just a short walk from the Texas Tech University Health Sciences Center—as well as an \$11 million clinic expansion project that took about two years, and added a third floor on the present TTUHSC at El Paso Medical Center building.
- In 2002, the Paso del Norte Health Foundation announced a \$1.25 million scholarship/grant loan program for TTUHSC at El Paso students choosing to practice in El Paso. By working together with TTUHSC, the Foundation would help meet the demand for physicians and provide the perfect environment for area students to improve their medical education, while contributing to the health of our region.
- In 2003, Texas Governor Rick Perry visited the El Paso campus for a ceremonial signing of House Bill 28, article 10, which authorized Texas Tech to issue \$45 million in tuition revenue bonds for the construction of a classroom/office building for a four-year medical school at the El Paso campus. The governor also announced an additional \$2 million in funding to finance start-up costs and faculty salaries.
- TTUHSC at El Paso Regional Dean Jose Manuel de la Rosa, M.D., was also appointed by President George W. Bush to the United States-Mexico Border Health Commission, recognizing TTUHSC as a national leader in border health issues. The bi-national commission developed and coordinated actions to improve the health and quality of life along the United States-Mexico border and studied ways to solve the border's health problems, a mission that mirrors that of TTUHSC at El Paso.
- On December 9, 2003, the ground breaking for El Paso Medical Science Building I took place, and two years later in January of 2006, a ribbon cutting followed. The 93,000 square-foot facility houses research on diabetes, cancer, environmental health and infectious diseases, as well as a repository dedicated to data on Hispanic health and a genomic facility to link hereditary diseases in families.

- In February 2008, the new school was preliminarily accredited by the Liaison Committee for Medical Education (LCME).
- In 2009, the school was renamed the Paul L. Foster School of Medicine (PLFSOM), and on July 13, 2009, the Inaugural Class of 40 students was admitted and began classes.
- In 2010, in collaboration with University of Texas Health Sciences Center in Houston – School of Public Health, the school established a dual degree MD/MPH Program. Currently 20 students are enrolled in this program.
- In May 2011, Founding Dean Jose Manuel de la Rosa was named Vice President for Health Affairs.
- In 2012, the fourth class of 80 students for PLF SOM was admitted and began classes in July, 2012. Additionally, Research awards approached \$14M, increasing from approximately \$13M in 2011.
- In February 2013, the School was fully accredited by the LCME, 100 students were admitted in 2013, and the first class graduated and in May 2013.

GRADUATE SCHOOL OF BIOMEDICAL SCIENCES

- The Graduate School of Biomedical Sciences, originally a part of the School of Medicine, became a separate school in 1994 to coordinate the training of biomedical scientists. It provides educational opportunities for students who seek research careers in the biomedical sciences to advance knowledge about normal and disease conditions in humans.
- The Graduate School of Biomedical Sciences (GSBS) currently has three graduate programs: Biotechnology, Biomedical Sciences, and Pharmaceutical Sciences. Concentrations within the Lubbock Biomedical Sciences program include Cell and Molecular Biology, Cell Physiology and Molecular Biophysics, Biochemistry and Molecular Genetics, Immunology and Infectious Diseases, and Pharmacology and Neurosciences. Although some graduates of these programs work in private industry, most hold postdoctoral fellowships and faculty positions at major medical schools throughout the United States and abroad.
- In 2012, the Lubbock campus expanded its Biomedical Sciences program to El Paso. The inaugural class in El Paso was admitted in the Spring of 2013.
- The philosophy of the GSBS is to provide each student with a broad understanding of biomedical research, yet develop the specialization needed to succeed as an independent investigator. This is accomplished on the Lubbock campus by requiring doctoral students to complete a common core curriculum. The core curriculum consists of courses in Molecules, Cells, Genes, Seminar and an introduction to Biomedical Research.

- In conjunction with the TTUHSC School of Medicine, the M.D./Ph.D. dual degree program has graduated nine M.D./Ph.D. students and has 12 students currently enrolled.
- The GSBS is awaiting Coordinating Board approval to offer a new masters degree in Public Health. If approved, the initial class of approximately 40 students will begin in the Fall of 2014.

SCHOOL OF NURSING

The TTUHSC School of Nursing is the only nursing school on the South Plains that provides baccalaureate, masters, and doctoral education. Since its inception in 1979, the school has offered innovative educational programs to meet the needs of Texas residents. With an expanded selection of program options offered throughout Texas and beyond, the School of Nursing continues to help bolster the state's nursing workforce by educating more than 1,400 students each year.

The first students were admitted to the Traditional Bachelor of Science in Nursing four-year degree on the Lubbock campus in August, 1981. Four years later, RN to BSN only students were admitted in the Permian Basin. The first students were admitted to the Master of Science in Nursing track in 1988, and the Accelerated Second Degree track was launched in Austin and in Lubbock in 2005, and is now offered in Abilene, the Permian Basin, Amarillo, and Dallas-Ft. Worth area. In 2008, the inaugural cohort of doctoral students was admitted into the Doctor of Nursing Practice degree program, and in 2009, the Traditional BSN program was expanded to include Abilene and the Permian Basin.

The TTUHSC School of Nursing is known for innovation in nursing education, excellent student retention and graduation rates, above national average National Council Licensure Examination (NCLEX) scores, and producing well-prepared nurses for West Texas and beyond.

UNDERGRADUATE STUDIES: The Bachelor of Science in Nursing track options include traditional, licensed RN and second degree (individuals with a bachelor's degree in another field) students. The school offers the following undergraduate programs:

- Bachelor of Science in Nursing (BSN)
- Registered Nurse to Bachelor of Science in Nursing (RN to BSN)
- Accelerated Second Degree BSN

GRADUATE PROGRAMS: The Graduate Departments use a variety of online technology teaching-learning methods to offer distance education classes and face-to-face classes in Lubbock, Odessa and Abilene. The school offers the following graduate degrees and certificates:

- MSN Leadership Program
 - Master of Science in Nursing – Administration Track
 - Master of Science in Nursing – Education Track
- DNP Program
 - Executive Leadership Track
 - PhD in Nursing (in collaboration with Texas Women’s University)
- MSN to APRN (Advanced Practice Registered Nurse) Program
 - Master of Science in Nursing – Family Nurse Practitioner (FNP)
 - Master of Science in Nursing – Adult Gerontology Acute Care Nurse Practitioner (AGACNP)
 - Master of Science in Nursing – Pediatric Nurse Practitioner (PNP)
 - Master of Science in Nursing – Nurse Midwifery
- Post-Master APRN Program
 - Family Nurse Practitioner (FNP) Track
 - Adult Gerontology Acute Care Nurse Practitioner (AGACNP) Track
 - Pediatric Nurse Practitioner (PNP) Track
 - Nurse Midwifery Track

Two Centers of Excellence have been established at the School of Nursing. These Centers are multidisciplinary and/or interdisciplinary groups of faculty and their associates who have been brought together for the pursuit of research, education, and/or clinical activities. The goals of each center integrate into the strategic plan of the school.

Center for Innovation in Nursing Education: The CINE provides leadership in designing and implementing new and exciting nursing education initiatives to change the nature and quality of nursing education within Texas and throughout the nation.

Center for Excellence in Evidence-Based Practice: The CEEBP forms collaborations to improve the care and safety of patients through consultation, research, education, and practice as demonstrated through multiple avenues.

CAMPUSES: The TTUHSC School of Nursing has educational programs at the following locations:

- Abilene
- Lubbock
- Permian Basin
- Amarillo
- Austin
- Dallas-Fort Worth

GAYLE GREVE HUNT SCHOOL OF NURSING

The Gayle Greve Hunt School of Nursing (GGHSON) was officially opened as a free-standing school of nursing on September 1, 2011. The School was launched through the generous donation of \$10 million by the Hunt Family Foundation, and in April 2011, received initial approval from the Texas Higher Education Coordinating Board and the Texas Board of Nursing. The Commission on Collegiate Nursing Education's Board of Commissioners acted at its meeting in April, 2013 to grant accreditation to the baccalaureate degree program in nursing for five years, extending to June, 2018. The accreditation action was effective as of September 12, 2012. The program met all four accreditation standards and determined that there were no compliance concerns with respect to the key elements.

The GGHSON is on the U.S./Mexico border, and is positioned to become the gold standard for undergraduate and graduate nursing education. The current enrollment is comprised of an 85% Hispanic population and a total of 103 students.

UNDERGRADUATE PROGRAMS: BSN programs are for traditional and second degree students (individuals with a non-nursing baccalaureate degree). The following undergraduate degree programs are offered, and Graduate programs are in the planning stages:

- BSN
- Second Degree BSN

SCHOOL OF ALLIED HEALTH SCIENCES

- The School of Allied Health Sciences offers eighteen different doctoral, masters, baccalaureate, and post baccalaureate health professions degree programs in the rehabilitation sciences; clinical laboratory sciences; speech, language and hearing sciences; and disciplines related to primary care and healthcare management. With a Fall 2013 enrollment of 1299 students on four campuses (Lubbock, Amarillo, Odessa and Midland), it is one of the largest and most diverse schools of Allied Health Sciences in Texas. From our first class of eighteen students in 1983, the School has grown steadily over the past 30 years. The School continues to educate allied health professionals to meet the evolving healthcare needs of all people in West Texas, the state and the nation. The School of Allied Health Sciences remains focused on developing and presenting educational programs of the highest quality in a student-centered learning environment.
- Academic degree programs offered include a Ph.D. degree in Communication Science and Disorders, and a Ph.D. in Rehabilitation Sciences; Doctor of Audiology (AuD), Doctor of Science in Physical Therapy (ScD/PT) and Doctor of Physical Therapy (DPT/Transitional DPT); Master of Science degrees in Molecular Pathology, Speech-Language Pathology, and Clinical Practice Management; professional Masters degrees in Athletic Training (MAT), Occupational Therapy (MOT), Physician

Assistant Studies (MPAS), and Rehabilitation Counseling (MRC); and Bachelor of Science degrees in Clinical Laboratory Science; Speech, Language and Hearing Sciences; Clinical Services Management; and Health Sciences.

- To increase educational access to allied health professionals who are serving communities throughout rural West Texas and the state, some programs rely extensively on non-traditional formats or distance education technologies. The ScD-PT employs a unique combination of weekend clinical clusters in communities around the state and nation that are supported by distance education technology, as well as short, intensive periods on campus to offer practicing physical therapists the opportunity to achieve advanced clinical skills and competencies while maintaining their practice. The Transitional DPT (Doctor of Physical Therapy) program is an online program designed to provide practicing physical therapists with a Masters degree (MPT) or Bachelors degree (BSPT) the opportunity to earn a clinical doctorate. The physical therapy profession has recently migrated from an entry level MPT to the DPT. The Transitional DPT allows MPT and BSPT clinicians to advance their knowledge to a level consistent with the current professional DPT standards. Students can continue their full-time employment while enrolled in the online program, as the clinical setting provides the ideal environment to apply newly-learned information. The M.S. in Clinical Practice Management provides an internet-based opportunity for traditional clinicians and other health professionals to expand their knowledge and skills in clinical practice management without leaving their communities. Similarly, the Master of Rehabilitation Counseling provides an opportunity for vocational rehabilitation counselors of the Texas Rehabilitation Commission, other State agencies and within the private sector to obtain their professional credentials while continuing to serve their clients. The Bachelor of Science in Clinical Laboratory Science program offers a second degree online tract for students who already hold a Bachelor of Science degree. A second online tract is available for students who wish to earn a certificate in clinical laboratory science. Both online tracts qualify students to sit for the national certification in clinical laboratory science through the American Society of Clinical Pathology Board of Certification. The Bachelor of Science in Clinical Services Management provides a web-based baccalaureate degree for traditional undergraduate students and graduates of community college Associate of Applied Science programs to prepare for career ladder progression, while continuing employment within their communities.
- In addition to its eighteen different degree programs, the School operates two Centers that have been approved by the Texas Tech University System Board of Regents:
 - The **Center for Speech, Language and Hearing Research** within the Department of Speech, Language and Hearing Sciences, seeks to integrate and support cross-disciplinary efforts in research, teaching and patient care that are aimed at increasing understanding and treatment of hearing, speech and/or language disorders across the lifespan.
 - The **Center for Rehabilitation Research** within the Department of Rehabilitation Sciences consists of four clinical research laboratories (Clinical Biomechanics Laboratory, Clinical Postural Control Laboratory, Clinical Musculoskeletal Research Laboratory, and Clinical Anatomy Research Laboratory), and integrates and promotes interdisciplinary research

and clinical services in the Rehabilitation Sciences. This center is the research environment for the PhD in Rehabilitation Sciences program.

- Personnel shortages continue in many of the Allied Health Sciences professions. Shortages are most acute in the clinical laboratory sciences, and for speech-language pathologists, audiologists, physician assistants, physical therapists and occupational therapists. Increasing demands for physical therapists and occupational therapists are projected for the foreseeable future to meet the needs of an aging population. Similarly, the demand for certified and licensed athletic trainers is expected to grow dramatically within our society.
- The School has an active faculty development program to encourage and provide financial support for faculty who participate in doctoral studies. With critical, national shortages of doctorally prepared faculty in the School's disciplines, this "grow your own" approach continues to strengthen the knowledge, skills and abilities of our faculty.
- Departments within the School of Allied Health Sciences include:

Laboratory Sciences and Primary Care

MS, Molecular Pathology

BS, Clinical Laboratory Science

Clinical Laboratory Science Post Baccalaureate Certificate

Master of Physician Assistant Studies (MPAS)

BS, Clinical Laboratory Science, Second Degree

Rehabilitation Sciences

PhD, Rehabilitation Sciences

Doctor of Physical Therapy (DPT)

Master of Athletic Training (MAT)

Health Sciences (BS)

Doctor of Science (ScD) in Physical Therapy

Transitional Doctor of Physical Therapy Program (tDPT)

Master of Occupational Therapy (MOT)

Speech, Language and Hearing Sciences

PhD, Communication Sciences and Disorders

MS, Speech-Language Pathology

Doctor of Audiology (AuD)

BS, Speech, Language and Hearing Sciences

Clinic Administration and Rehab Counseling

MS, Clinical Practice Management

BS, Clinical Services Management

Master of Rehabilitation Counseling (MRC)

SCHOOL OF PHARMACY

- The School of Pharmacy (SOP) was established in 1993 to offer the degree of Doctor of Pharmacy (Pharm.D). In addition to the traditional Pharm.D. Program, the School also supports a graduate Ph.D./M.S. Program in Pharmaceutical Sciences and a Residency Program in advanced pharmacy education. Through the Residency Program, pharmacists gain higher level practice skills leading to specialization beyond the basic Pharm.D. professional degree.
- The School began accepting applications and enrolled its first Pharm.D. class of 63 students in the fall of 1996. The founding class graduated in May 2000. Over the course of its history, the School has conferred 1,185 Pharm.D. degrees. In addition, 240 residents have completed the Pharmacy Residency program, and 62 students were awarded graduate M.S. or Ph.D. degrees in Pharmaceutical Sciences from the Graduate School of Biomedical Sciences.
- The School's vision statement reflects the changing responsibilities of the pharmacist and the role of the educator in that process. The School is learner-centered, collegial in nature, and uses state-of-the-art technology to cultivate practitioners dedicated to providing a high standard of care for their patients. The curriculum is built around a problem-based learning model and provides a stimulating and innovative cooperative educational environment.
- Due to the generous support of the Abilene Community Partners, the School opened a new campus in Abilene in Fall 2007. The campus, made possible from a \$15.6M gift to the University, includes all four years of the program. There are 19 FTE SOP faculty members, 31 staff members, and one resident in Abilene to serve up to 160 students annually.
- The School's Dallas/Fort Worth campus is located at the Dallas Medical Center with a second building at the North Texas Veterans Affairs Medical Center, for a total of 19,133 sq. ft. in the two facilities. The locations of each facility – the Dallas Medical Center campus being located near the University of Texas Southwestern Medical Center, Parkland Memorial Hospital, and Dallas Children's Medical Center; and the second building being located adjacent to the VA's clinic building - have proven to be an exceptional affiliation for the Pharm.D. and residency programs.
- The School is committed to providing West Texas and the Dallas/Fort Worth Metroplex with innovative pharmaceutical care. The faculty and pharmacy residents provide patient care through various contracts with external healthcare institutions including hospitals, community pharmacies, nursing homes, clinics, and the Texas Department of Criminal Justice.
- The School manages two pharmacies. Developed as model teaching pharmaceutical care pharmacies in Texas Tech clinics, these pharmacies emphasize comprehensive pharmaceutical care. The pharmacies include:
 - Amarillo Amarillo Pharmaceutical Care Center
 - Lubbock TTUHSC Pharmacy (main campus)

- The School manages and operates the Texas Panhandle Poison Center (TPPC). The TPPC serves 71 counties that cover the Amarillo, Lubbock, Wichita Falls and Abilene health marketing areas. For FY 2013, the total call volume for the TPPC was 20,172 calls received from throughout the coverage area.
- In addition to its direct patient care initiatives, the School supports a significant research program. The SOP building in Amarillo houses approximately 14,000 sq. ft. of laboratory space. The SOP also has wet research lab areas in the new Amarillo Research Building (14,500 sq. ft.), the Abilene SOP building (3,000 sq. ft.), and in Dallas at the Southwest Professional Building (17,453 sq. ft.). A new 11,900 sq. ft. research addition was constructed for the SOP Abilene Campus funded by a grant from the Dodge-Jones Foundation. The School across its campuses supports four research centers focused on 1) cancer biology, 2) clinical pharmacology and experimental therapeutics, 3) blood-brain barrier research, and 4) immunotherapy and biotechnology.
- The SOP receives significant external research grant and contract funding. Annual extramural grant funding to the School for FY 2013 exceeded \$5.2 million with 17 grants from the National Institutes of Health (NIH) and four grants from the Cancer Prevention and Research Institute of Texas (CPRIT). Overall research expenditures by the School exceeded \$9.6 million during the same period from all sources.
- Each year the School convenes a research retreat named Research Days to bring together faculty, residents, staff and students to discuss research progress over the previous year and to foster future collaborations on new projects and initiatives.

CORRECTIONAL MANAGED HEALTH CARE (CMHC)

During the 1993 Legislative session, the Texas Legislature established a Correctional Managed Health Care Advisory Committee (CMHCAC) and charged it with developing a managed health care delivery system to provide health care to Texas Department of Criminal Justice (TDCJ) offenders. The Committee established a contract with TTUHSC to provide health care for the TDCJ facilities in the western part of the state. Of the approximately 152,000 offenders housed in TDCJ facilities, the western sector has approximately 32,000 beds in 31 facilities at 18 sites. Included is a 550-bed psychiatric hospital located in Lubbock, which opened in July 1995. A regional medical/surgical prison facility, adjacent to the psychiatric hospital, opened September 1996 with medical/surgical care provided by the TTUHSC School of Medicine. This facility was expanded by 44 beds in 2006, yielding a total of 88 medical/surgical and emergent care beds. TTUHSC is responsible for providing ambulatory care at the TDCJ facilities, developing Preferred Provider Networks, providing long term care, and operating a telemedicine program. In addition, TTUHSC is responsible for contracting with local community hospitals and staffing new facilities. All facilities are accredited by the American Correctional Association.

Psychiatry support for TDCJ was moved to TTUHSC on January 1, 1996, with TTUHSC providing the mental health care in West Texas. In addition, TTUHSC has the only Program for the Aggressively Mentally Ill Offender (PAMIO) in the state. This program has received national recognition for the innovative approaches to these challenging patients. Pharmacy services for the TDCJ contract are provided through a central contract managed in cooperation with the TTUHSC School of Pharmacy in Amarillo.

During the 1999 Legislative Session, the Committee was renamed the Correctional Managed Health Care Committee (CMHCC), and in 2011, funding shortfalls resulted in the legislative decision for TTUHSC CMHC to contract directly with TDCJ for offender health care services.

The role of the correctional telemedicine program is to provide specialty consults for the TDCJ offenders by connecting correctional facility clinics with medical school and Montford Complex consultants in Lubbock. It reduces backlog in needed specialty clinics and initiates a referral pattern to the TTUHSC specialists. The telemedicine program has also been a public safety tool by reducing the need to transport offenders from prisons to receive specialty care. The correctional telemedicine system is located in 16 of the 31 TDCJ prison units served by TTUHSC. With deployment of telemedicine in the larger facilities and at sites with multiple prison units, 92% of the offenders served by TTUHSC have telemedicine access.

CMHC staff uses a “state-of-the-art” electronic medical record (EMR) system, customized for correctional use. This EMR design supports discrete data capture at the point of care, accommodates complex consultations, provides authorized users with offenders’ medical histories, and facilitates a long-sought need for connectivity and standardization. CMHC also uses a pharmacy interface called Pharmacy Replacement System (PRS) that includes electronic physician order entry. The PRS/EMR interface transfers medication ordering information in real time from any location to the centralized state pharmacy, so medication orders are delivered within 24 hours.

F. MARIE HALL INSTITUTE FOR RURAL AND COMMUNITY HEALTH

The F. Marie Hall Institute for Rural and Community Health continues to support, expand, and redefine its efforts in West Texas to reach and meet the needs of people in rural and urban communities within the TTUHSC region and beyond. On the edge of cutting innovation and ideas, the Institute is a leader in rural outreach and community partnerships that service health care providers and patients.

TTUHSC is making great strides in education, research, and health care. The Institute has made significant growth in support of all these areas since 2006, and continues to do so. With many ways to measure success in the Institute, focusing on the multiple key programs exemplifies its endeavors. The Institute is a multidisciplinary group of professionals that are focused on key programs in five major areas:

West Texas Area Health Education Center (AHEC): The West Texas AHEC program and its five regional centers serve as the Institute’s outreach arm to engage communities in assessing their healthcare needs and to coordinate the pipeline of the healthcare

workforce for the region. The West Texas AHEC facilitates a comprehensive longitudinal pipeline of activities to support future healthcare workforce development, as well as existing rural health providers in West Texas. The core programmatic areas and FY 2013 highlights are:

- Created a pipeline for healthcare workforce development - informed, encouraged and prepared rural and underserved youth to pursue health professions education.
- Expanded and optimized community-based clinical training resources, which is critical to meeting current and future needs of the state. Community-based clinical training provides real, direct benefit to training programs, to local communities, and to students themselves.
- Facilitated community health education to assist communities in addressing priority health needs.

West Texas Health Information Technology Regional Extension Center (WTxHITREC): The WTxHITREC is fully engaged in assisting health care providers in achieving the Meaningful Use (MU) of Electronic Health Records (EHRs) across West Texas.

Going forward, the WTxHITREC is determined to implement new strategies and rely on its skilled staff to address the EHR needs of West Texas. These strategies include the following:

- Continuing to enroll primary care providers and critical access hospitals eligible for federally subsidized services.
- Providing services to specialists to help drive this group towards MU.
- Participating with the Texas Health and Human Services Commission (HHSC) to provide state subsidized services to cardiologists, endocrinologists, pulmonologists, and psychiatrists to help drive the providers in these practice areas towards MU.
- Participate with the Texas Health Services Authority (THSA) to promote THSA's White Space Voucher Program and Health Information Exchange (HIE) initiative. This work has led to a new contract with the HHSC to create a Texas White Space Advisory Committee with the goal of governing a White Space query-based HIE.
- Participate in a newly funded Rural Workforce Grant with the Area Health Education Center of the Plains and Midland College. The WTxHITREC will be funded to recruit students to the Midland College certificate program and to offer preceptor opportunities to the enrolled students.

Telemedicine: The Telemedicine program at TTUHSC, which was developed in 1990, integrates services to bring innovative solutions to the broad spectrum of health-related challenges across West Texas by using technology to overcome access barriers related to distance to provide quality patient care that meets the local needs of rural and urban communities. Through videoconferencing technology, patients can be connected with health care providers hundreds of miles away, serving people and communities that are located hours from medical services. The following are a few of the programs supported by Telemedicine:

- Community Telemedicine
- Specialty Care
 - *Medicine Burn Program* with El Paso Department of Surgery
 - *Telemedicine Dermatology Program* with El Paso Departments of Pediatrics and Dermatology
 - *Telemedicine HIV Project* with Departments of Internal Medicine in Lubbock and Abilene
- Correctional Telemedicine
- TexLa Telehealth Resource Center – This Center is one of 14 HRSA grant-funded centers to provide technical assistance to rural and underserved communities seeking to develop or expand a telehealth program.

Rural Health Research Group: Originally initiated in 2006 as the Cochran County Aging Study, Project FRONTIER (**F**acing **R**ural **O**bstacles to healthcare **N**ow **T**hrough **I**ntervention, **E**ducation & **R**esearch) is an epidemiological study to explore the natural course of chronic disease development and its impact on longitudinal cognitive, physical, social and interpersonal functioning in a multi-ethnic, adult sample from rural communities of West Texas. Information from this study can then be used to develop programs for effective disease management, preservation of cognitive functioning through the lifespan, and improvement of the overall health of individuals living in rural West Texas.

Since its beginning, the data from the Cochran County Aging Study and Project FRONTIER have been analyzed by over 80 researchers affiliated with 13 different institutions. This has resulted in over 32 publications in peer-reviewed journals and 24 presentations at national, regional, and university-specific meetings. Ongoing Project FRONTIER research studies range from the effects of language preference and proficiency on health status to the effects of groundwater arsenic concentrations on Alzheimer’s disease to suicidality in rural communities to socioeconomic status’ impact on multicorbidity. Other studies are also in the developmental stage using this unique data set. Currently, Project FRONTIER is collecting data from participants in the West Texas counties of Cochran, Bailey, and Parmer, and was expanded into Hockley County in 2013.

Data Management and Analytics: The Data Management and Analytics department (DMA) is a resource dedicated to supporting the Institute and the communities within the TTUHSC service area. The DMA supports the academic and community-based endeavors of the Institute by providing information through geomapping and analysis. The DMA serves as an authoritative source for rural health issues, turning complicated data into comprehensive visuals and responding with real-time data. By gathering data for grant applications, papers, projects, maps, and 1115 waiver applications, DMA supports the Institute in identifying, supporting, and meeting the needs of West Texas. Along with data management, policy analysis, and research, the DMA also provides information technology (IT) support to the Institute units by way of desktop and computer maintenance, hardware and software inventory purchasing, and IT-related research and product analysis.

- The DMA provides grant-writing support to the Institute. A current DMA-facilitated grant is the Telemedicine, Wellness, Intervention, Triage, and Referral Project (TWITR Project). The TWITR Project is a two-year pilot study funded from the Office of the Governor to bring mental health services to at-risk youth in three West Texas communities.
- By using current information and statistics, the DMA provides answers and support for academic peers and the community. One example is the Community Health Needs Assessments (CHNAs) that the counties and hospitals in West Texas faced with the implementation of the Texas Medicaid 1115 Waiver and changes in IRS reporting requirements for non-profit hospitals. These assessments provide a great example of the in-depth analysis the DMA can produce to identify the needs of the surrounding communities. To date, the DMA has produced over 120 CHNAs.
- The DMA also uses collected data to produce reports, such as an Emergency Medical Services (EMS) report discussing resource gaps and needs of EMS in West Texas, and a report on the condition of the mental health infrastructure.

Additional information on the programs of the F. Marie Hall Institute for Rural and Community Health can be found online at <http://www.ttuhsu.edu/ruralhealth>.

INFORMATION TECHNOLOGY

TTUHSC uses a wide range of information systems technologies to support its academic, clinical, research and service missions. The services provided by the Information Technology (IT) Division have enabled the institution to establish an integrated network that connects all TTUHSC campuses and clinics together as a system, and extends the institution's outreach to communities in need. The Division is comprised of the Office of the Chief Information Officer (CIO), Technology Services, Information Services, TechLink, Health.edu, and Security. The Technology Services and Information Services departments provide the institution with technology enabled services in the areas of PC support, server administration, data center operations, networking, programming support, data management, systems management, video conferencing, project management, and scheduling of technology resources. The scope of services includes:

- ▶ Providing and supporting a wide area data network that supports all campuses and outlying clinics;
- ▶ Providing and supporting a high-speed ATM or Gigabit Ethernet network infrastructure between all campus locations;
- ▶ Providing institutional support for over 10,500 computers across all campuses through telephone support and actual hands-on repair and replacement of both hardware and software;
- ▶ Providing access to computer-based training on software programs and other technologies for students, faculty and staff;
- ▶ Providing and supporting institutional data file storage and printing services;
- ▶ Providing and supporting an institutional messaging and collaboration system via Microsoft Exchange;
- ▶ Providing and supporting an institutional unified communications system via Microsoft Lync 2010 (currently in a pilot phase of implementation);

- ▶ Providing essential backup services of institutional data;
- ▶ Hosting (physical and virtual) and providing support, maintenance and backup of departmental servers;
- ▶ Providing the institution with electronic security protection from outside intrusions and computer virus attacks;
- ▶ Providing appropriate project management guidelines for all institutional information resource projects;
- ▶ Providing and supporting Internet connectivity, including wired and wireless network connectivity on-site at each campus, and remote Virtual Private Networking (VPN);
- ▶ Providing, designing and supporting web and other application development for academic and clinical information;
- ▶ Providing video teleconferencing networks and services for distance learning, telemedicine and other institutional applications;
- ▶ Providing and operating a multi-campus resource reservation system for the management and scheduling of multiple-use video teleconferencing facilities;
- ▶ Providing a student-centric Digital Signage System for the display of information of interest to the student body, such as class schedules, student special events, news, and emergency notification; and
- ▶ Providing governance and oversight of institutional information technology projects.

Digital Network: The existing digital network infrastructure consists of a 2 to 10 Gigabit uplink Ethernet campus LAN environment with core speeds of 10 gigabits (10,000 megabits per second), and WAN connectivity of ATM OC-3 (155 megabits per second) or Gigabit (1,000 megabits per second) to each regional campus. The core infrastructure equipment that supports the primary institutional servers operates at 10 Gigabit uplink transmission speeds. Network connectivity for faculty, staff and students is available at 10/100/1,000 megabits to the desktop. Data connectivity is provided for students in TTUHSC's labs, classrooms, study areas, student center and libraries. Faculty, staff and students also have secure wireless access to network resources throughout all campuses. Access to information resources exists through Texas Tech University's access to LEARN. Additional collaboration with the general academic university is available through shared Student Information and Administrative Systems. Some of the shared administration systems include financial accounting, personnel and payroll systems. Search engines for each campus cover information on web pages for both TTU and TTUHSC.

The Information Technology Division provides file services, web-based reference material, interactive video teleconferencing for distance learning and telemedicine (TechLink and Healthcare Services network), discussion forums, and electronic mail – all used by the Schools to support their educational programs. Application and web programming support, as well as data management services are also provided to support academic, clinical and research efforts. An automated resource reservation tool optimizes the scheduling of video teleconferencing resources to support the delivery of educational programs and healthcare services. Students also use network file servers and other services to store and access cloud based video, SharePoint and other educational materials. Education is supported and enhanced through the institutional learning management system. Education is further supported through Internet availability for library resources, web-based materials, e-mail, and other information technology resources required for enhancing the educational experience. These web-based services are provided so educational material can be made available for student use. Web-based services are also used to distribute general announcements or information to faculty, staff and students. All faculty and students are assigned e-mail addresses so that faculty-to-

student, student-to-faculty, and student-to-student communication is supported. Additionally, online training is provided 24/7 for faculty, students and staff, with over 300 IT, personal enrichment, and professional development courses.

Educational Support: TechLink: The TechLink network connects 51 distance learning classrooms and 40 conference rooms on all campuses. Using state-of-the-art compressed high definition digital video and audio technology, the network provides live, interactive video teleconferencing capability among all campuses for research, administrative, teaching, and other educational support activities. Carrying over 22,800 event hours in FY 2013, the network:

- Maximizes the outreach and impact of limited faculty resources;
- Provides quality undergraduate and graduate courses to students on all campuses;
- Facilitates curriculum consistency and continuity; and
- Reduces faculty and student travel among the campuses.

The network also features a video teleconferencing portal for connecting TTUHSC classrooms and conference rooms on the TechLink network to those of other institutions such as medical centers and universities. This enables TTUHSC faculty, staff and students to collaborate with colleagues at other locations on a wide variety of academic, business and healthcare matters, reducing the need for frequent travel.

Healthcare Services: The Healthcare Services network utilizes compressed digital video and audio transmitted via terrestrial circuits to provide Texans with direct patient care and information. The Healthcare Services network includes more than 30 campuses, rural and correctional sites. These facilities support telemedicine activities through live, interactive video consultations between medical specialists at all campuses of TTUHSC, in addition to Primary Care Physicians, Physician Assistants, Nurse Practitioners and their patients in West Texas and the State's correctional facilities. The network facilitates full motion picture quality video interactions among all parties and the transmission of critical patient information including electronic medical records, diagnostic data and images. A video teleconferencing portal is available to the Healthcare Services network, enabling healthcare providers in West Texas to enhance their services by consulting with colleagues at medical facilities outside the TTUHSC system on a variety of healthcare and related matters. The practice of medicine through telecommunications technologies has increased access to quality healthcare in State correctional facilities and underserved rural communities. The availability of telemedicine and related services plays a vital role in enabling the rural community infrastructure to remain viable and healthy.

Health.edu: Health.edu is a multi-format continuing education and in-service training provider. Health.edu is supported by a comprehensive online learning management system, and is used to extend the resources of healthcare facilities and professionals working in diverse healthcare areas. Over 220 hours of new continuing education and training programs are delivered to healthcare professionals and hospital staff annually in a variety of media formats. Continuing education programs are delivered via Health.edu to physicians, nurses, allied health professionals, and facility staff at more than 200 hospitals and clinics in all regions of Texas, including 79 Critical Access Hospitals. The services are provided at no cost to these essential community resources under a partnership developed with the Office of

Rural and Community Health. In addition to the facilities in Texas, Health.edu provides education services to over 400 hospitals, civilian and military, throughout the United States. Extended accreditation periods and multiple cross-accreditation programming have increased the approved hours for healthcare professional disciplines to over 670 hours per year. Expanded programming, such as safety and patient and community education, has significantly added quality and value to the services offered to all healthcare staff and their community. Health.edu issues more than 900,000 contact hours and awards over 785,000 CE certificates per year. The use of Health.edu has reduced professional isolation and has enabled rural practitioners to assimilate expert developments in their respective fields and to maximize the time they can devote to direct patient care.

Information Technology Security: The technology infrastructure and systems require a high level of security to protect sensitive and confidential information. The Information Technology Division ensures that security measures and best practices are followed to provide maximum protection for critical and confidential information. Training, software, hardware, and staff support provide the critical components necessary for the security of institutional information assets.

Information Technology Project Management Office: Policies and procedures for managing information resource projects at Texas institutions of higher education must conform to the Texas Administrative Code (TAC), Title 1, Part 10, Chapter 216. At TTUHSC, the Information Technology Project Management Office (ITPMO) has established a TAC compliant process based on the Texas Project Delivery Framework and other widely accepted methodologies, including the Project Management Body of Knowledge (PMBOK), a global standard. Within this process, a governance group assigns each project to one of five levels based on complexity and risk, establishing the degree of formal project management procedures to be applied. From the information gathered during project definition, project priority is determined and the necessary IT resources are assigned. The ITPMO monitors each phase of project implementation, reporting progress, issues and trends to the CIO, and ensuring compliance with applicable project management practices. Project management policies and procedures are reviewed at least annually, ensuring continuous process improvement and verifying compliance with institutional, state and federal legislation and mandates.

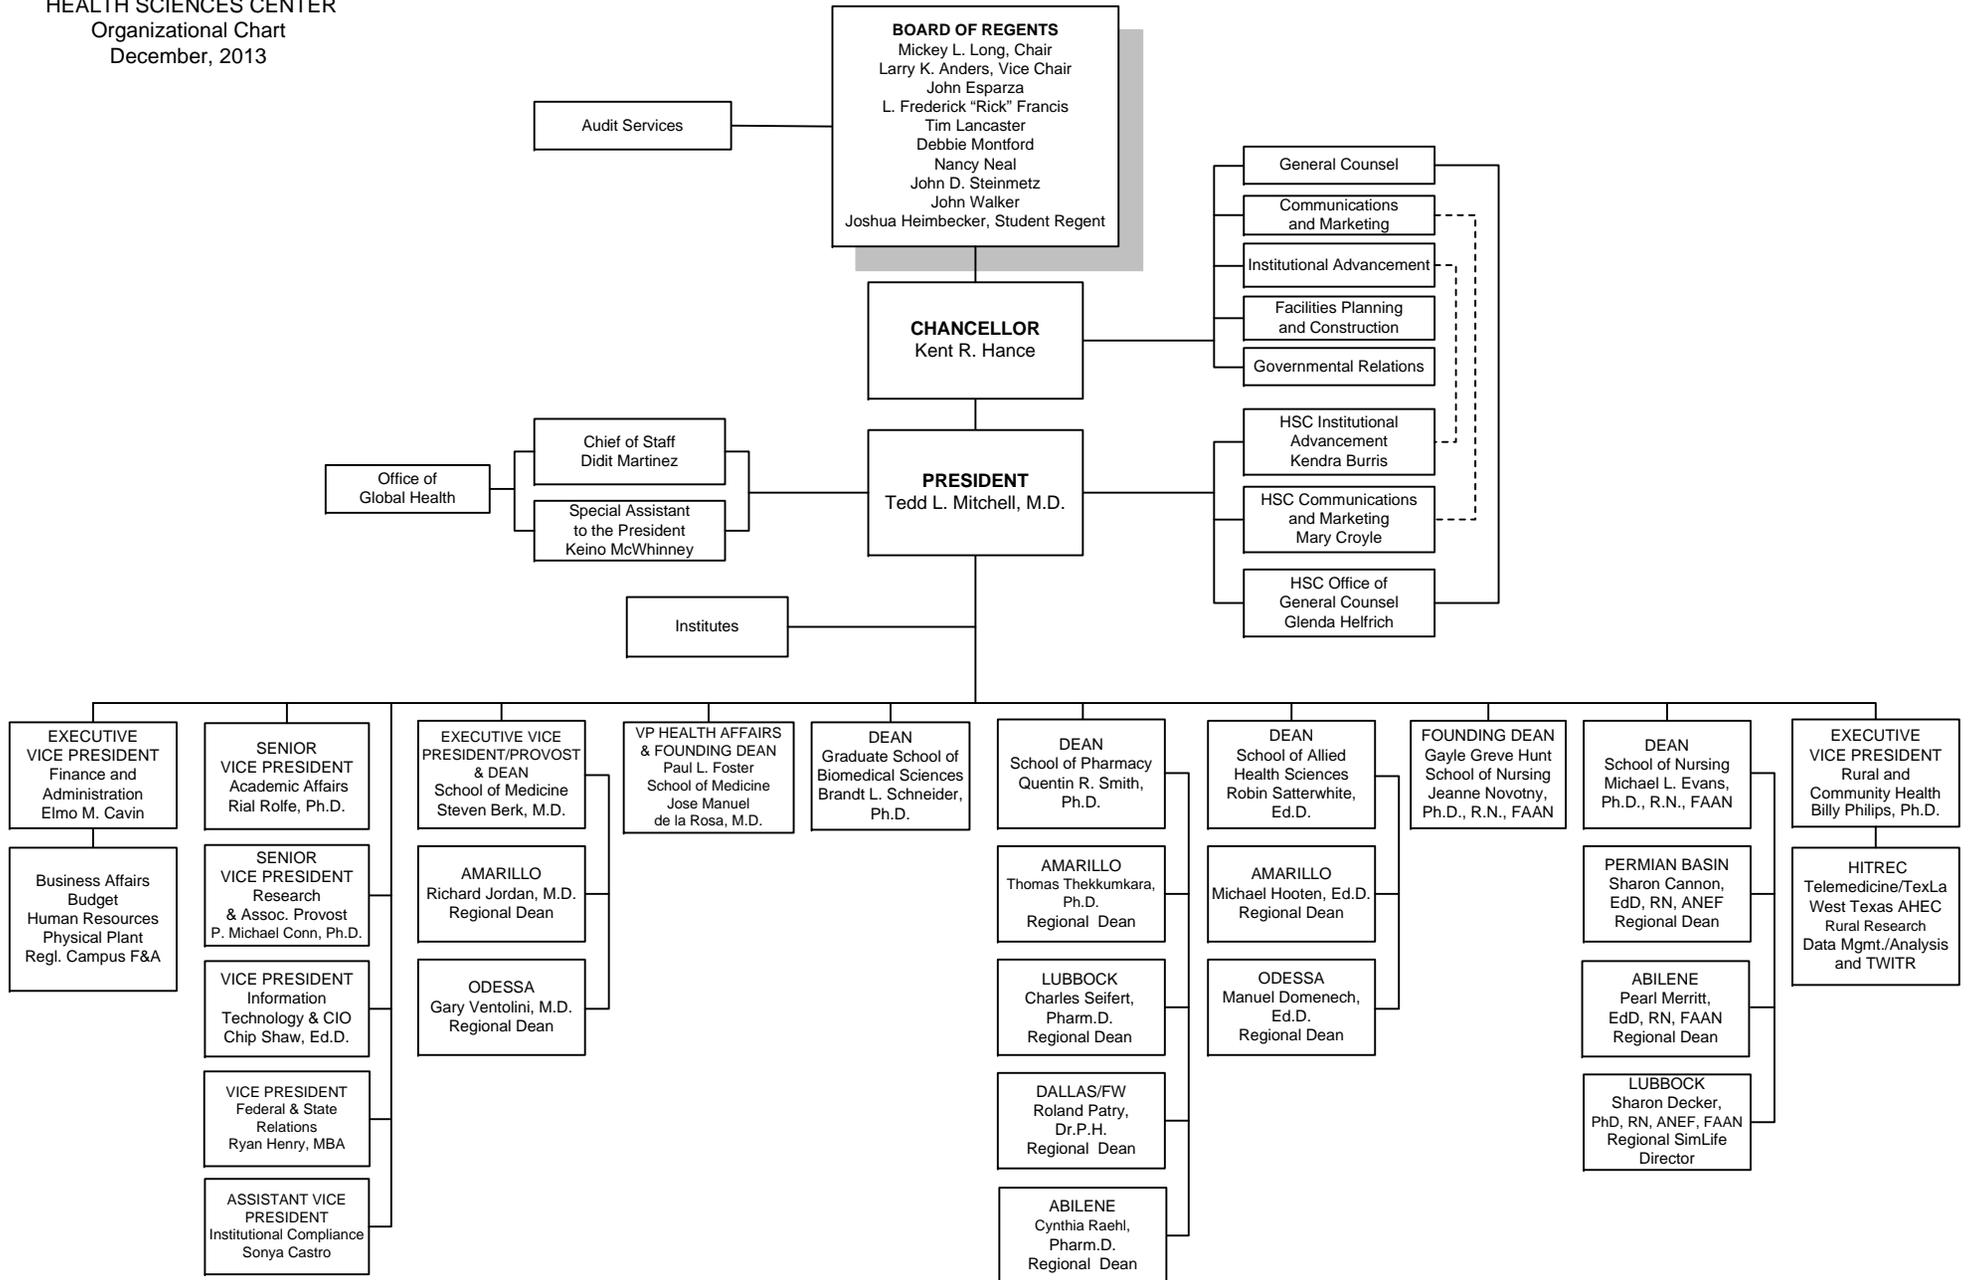

LIBRARIES OF THE HEALTH SCIENCES

The Libraries of the Health Sciences, founded in 1971, exist to meet the curricular, research and patient care information needs of the students, faculty and staff of TTUHSC at the Lubbock, Amarillo, El Paso and Odessa campuses. By extension, the libraries also exist to meet the information needs of the larger biomedical and health care community of the 108-county West Texas service area of TTUHSC. The libraries, one at each of these four campuses (plus a second at El Paso), are staffed by 21 professional librarians, two administrative staff, and 27 support staff. Professional librarians hold academic appointments in the School of Medicine's Health Communications Department and teach a variety of information management and computer courses to students of all degree programs within TTUHSC. The libraries are fully computerized and share a common online catalog, as well as a variety of electronic databases. TTUHSC library users currently have access to 28,751 electronic journals, 55,182 electronic books, and 612 electronic databases. Through a proxy server, users may access this material from off-site locations as well. All TTUHSC libraries have an electronic virtual reference librarian system to assist

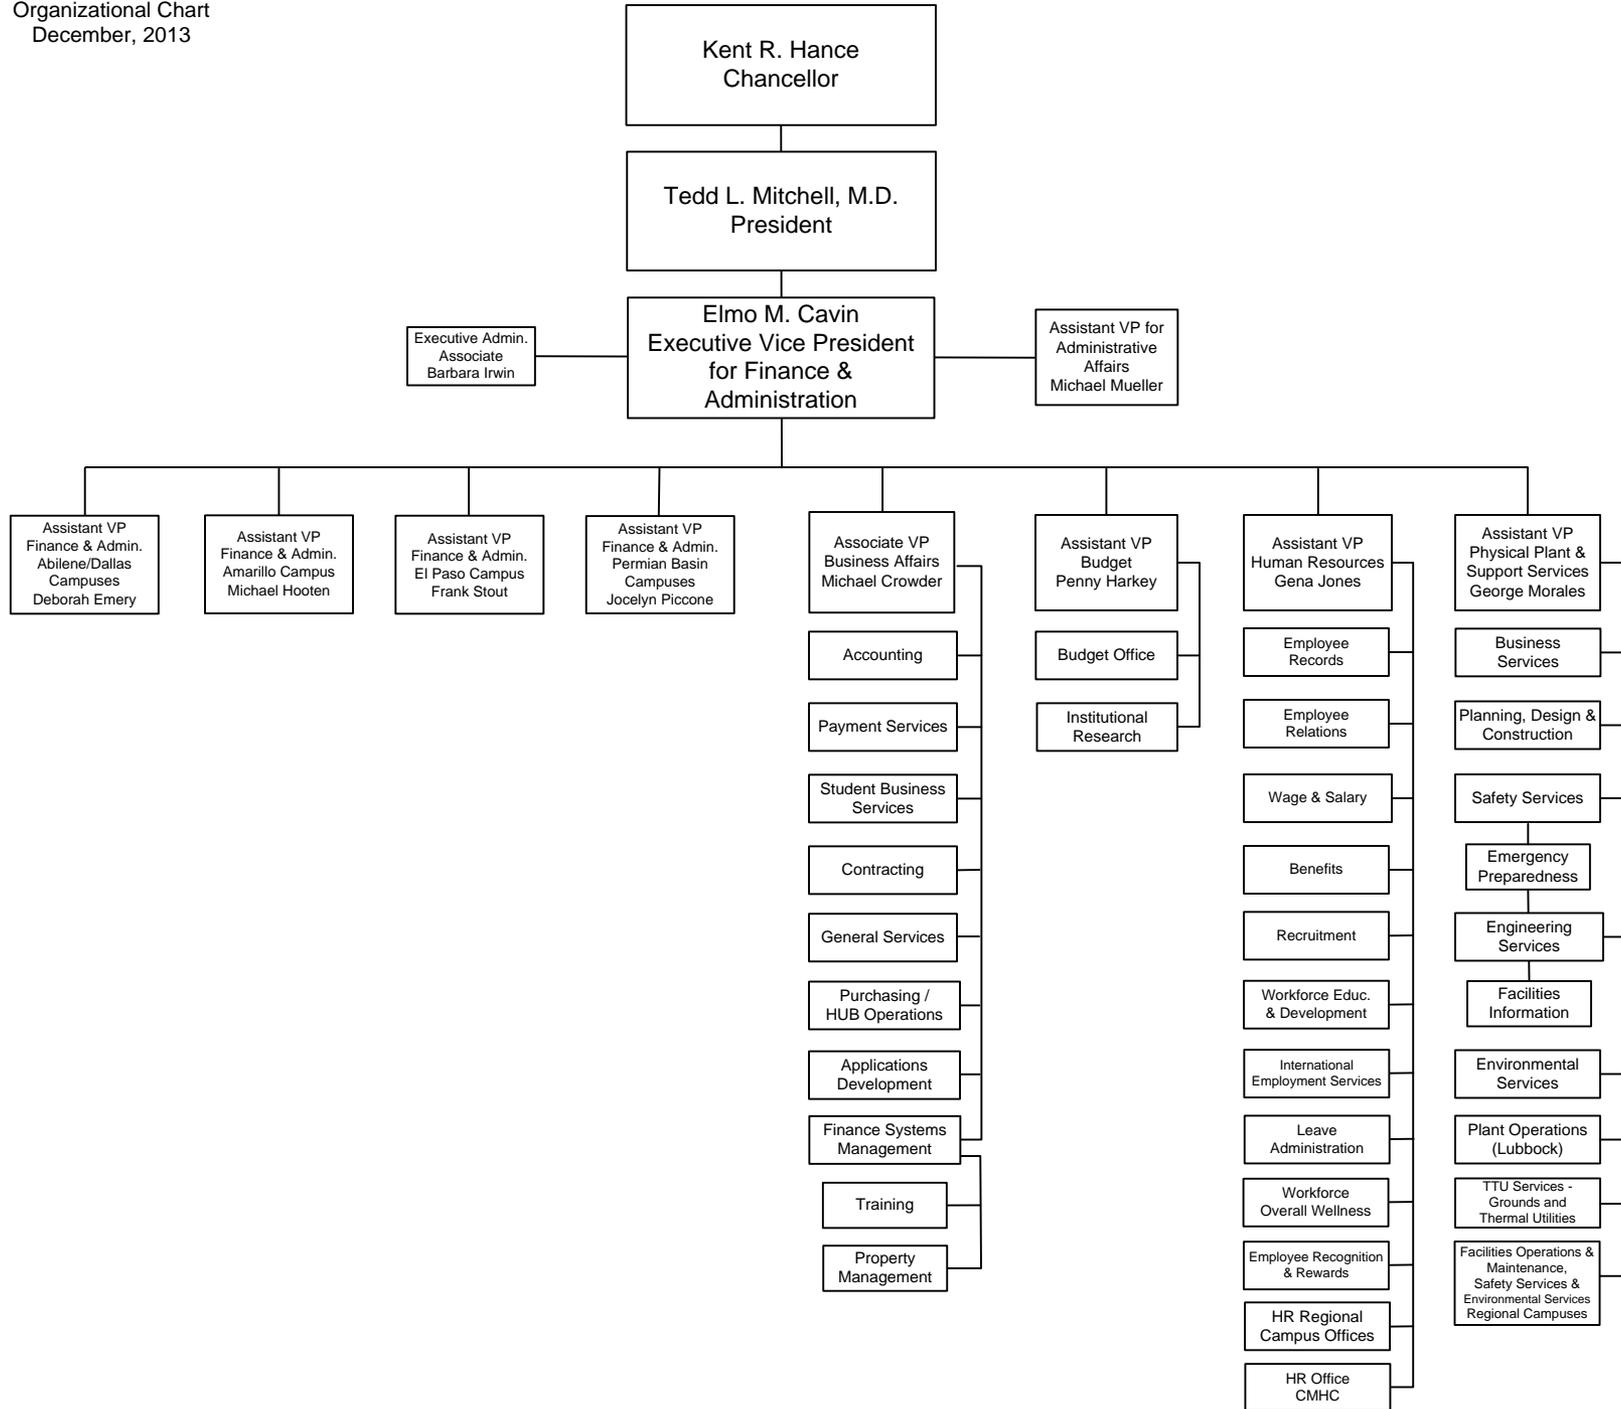

in the delivery of services to distance education students. The libraries currently have over 25 external contracts and service agreements in place throughout the urban and rural areas of West Texas, in order to provide biomedical information support to unaffiliated health care-related entities. In the Fall of 1997, the remote campus libraries at Amarillo, Odessa and El Paso added a significant number of hours of operation (nights and weekends) to expand opportunities for service to users. The Lubbock library hours are currently 105 per week, while the mean average of hours of operation for the 125 medical school libraries in the U.S. and Canada is 98. In the summer of 1998, the Lubbock library (Preston Smith Library of the Health Sciences) moved to a new 50,000 sq. ft. facility. It features 31 group study rooms for use by TTUHSC students, a 60-workstation computer lab, and adequate space to consolidate all library collections in one location. The library is equipped with 17 additional public access computers as well. The need for remote storage of resource material was thereby eliminated. In the summer of 2008, the El Paso Library was named the Delia Montes-Gallo Library of the Health Sciences, and in the fall of 2008, that library opened a new 6,000 sq. ft. additional library on the new El Paso campus. In 2006, as a result of local community involvement and fundraising activity, the Permian Basin/Odessa campus library added an 18-station computer laboratory within its existing space. In 2012, the number of answered reference questions at the libraries was 34,842, while the mean average of answered questions for the 125 medical school libraries in the U.S. and Canada is only 8,327. During the recent SACS (Southern Association of Colleges and Schools) accreditation visit, the TTUHSC libraries were commended by SACS for their services to students on campus and at distance, and the libraries were also commended recently by LCME (Liaison Committee on Medical Education). In terms of collections, the libraries have more physical volumes than any other health sciences library in Texas at 394,674, which is 40,000 more volumes than our nearest competitor. TTUHSC Libraries have held on to our print collection while other libraries have removed them in favor of electronic copies. Print versions of items contain many features that are not available in the electronic version. TTUHSC Libraries' retention of print journals and books has resulted in the generation of over \$40,000 this past fiscal year, with most of this amount being generated by interlibrary loan to other entities. Our ratio of borrow to lent has always been substantial, and we have been net lenders for many years. This year, a ratio of eight items for each one borrowed was supplied. In 2011-2012, total expenditures in personnel, collections, and recurring capital were \$5,444,188, while the national mean was \$3,751,831.

Financial Aid Enrollment and Recipients 2004-05 through 2013-14 est.

**Number of Students Enrolled in Fall and
Number of Students Receiving Financial Aid**

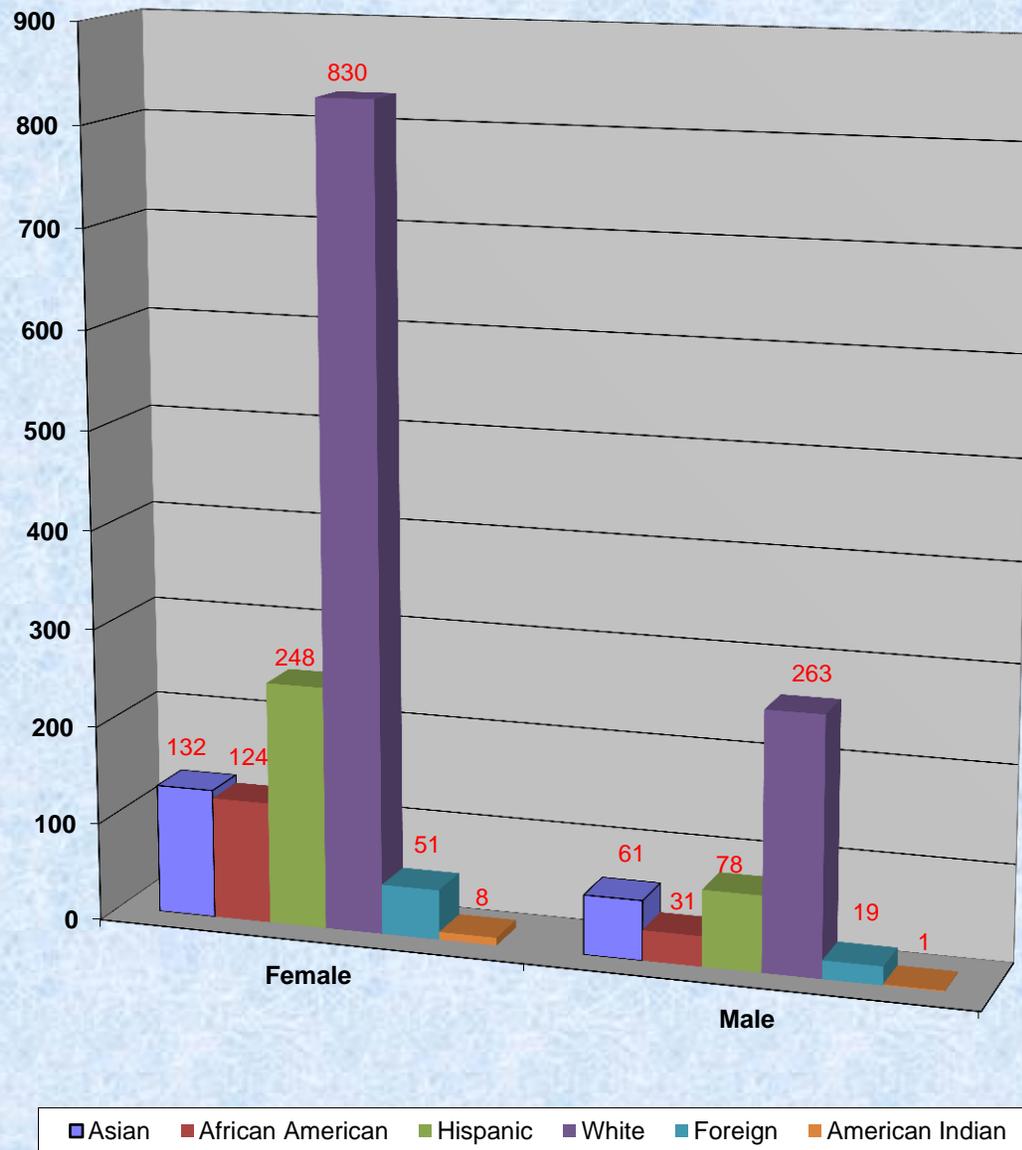

TTUHSC Degrees Awarded by Academic Year 2004 - 2013

Notes:

2004-05, there were 808 degrees awarded to 787 recipients.
2005-06, there were 900 degrees awarded to 895 recipients.
2007-08, there were 1,010 degrees awarded to 998 recipients.
2008-09 there were 1,111 degrees awarded to 1,104 recipients.
2009-10 there were 1,227 degrees awarded to 1,223 recipients
2010-11 there were 1,418 degrees awarded to 1,414 recipients
2011-12 there were 1,650 degrees awarded to 1,648 recipients

TTUHSC Degree Recipients by Sex/Ethnicity 2012 - 2013

NOTES:

1. The breakout above includes the distribution of Academic Administrators (Deans) in their respective locations, although Academic Administrators are actually counted as staff group (02) in the President's Division in the Affirmative Action Plan (AAP). There are 23 Academic Administrators (Deans) this Fall, 2013.
2. Correctional MHC staff are included in either Amarillo and Lubbock totals due to the organization's administrative structure, although the actual work locations of these staff vary.
3. Employees attached to the Texas Tech University System are counted in that section of TTU's Affirmative Action Plan and are not reflected in the above totals.

SOURCE: Fall 2013 figures were taken from the October 05, 2013 Employee CAAM's report.

***LIBRARIES OF THE HEALTH SCIENCES CENTER
E-RESOURCE STATISTICS***

E-resources form a major component of our acquisitions for all health sciences libraries. Inasmuch as they fit the definition for library resources as capitalized items as set forth in the SPA Process User's Guide I.4, we are reporting them in this report. Since they are all electronic items for use throughout the TTUHSC system, they are not rationalized to specific campuses, but rather are reported for all sites.

	Fall 2010		Fall 2011		Fall 2012		Fall 2013	
E-books	42,152	\$149,047.90	48,437	\$228,315.00	50,439	\$352,811.00	55,182	\$170,272.00
