INSIGHTS FROM THE GLOBAL INITIATIVE: EMPOWERING COMMUNITY HEALTH WORKERS TO BRIDGE HIV HEALTHCARE DISPARITIES

WEDNESDAY, APRIL 22, 2026
12:00 pm via Zoom

Join us as we welcome Kelli Keith, MPH from the Community Education Group.

The Community Education Group's Global Initiative addresses healthcare disparities by empowering community health workers through community-driven strategies that bridge global gaps in access, equity, and training. Focusing on underserved regions of Appalachia and Sub-Saharan Africa, the Initiative combines technical assistance, capacity-building, and participatory evaluation to co-create sustainable healthcare solutions. Insights were drawn from symposia held in Munich and Lima, along with CHW-focused survey responses from over 20 countries spanning five continents.
