

GLOBAL HEALTH LECTURE SERIES

ENVIRONMENTAL HEALTH IN THE US: A HISTORY

WEDNESDAY, MARCH 4, 2026
12:00 pm via Zoom

Join us as we welcome Dr. Mark Stoll from Texas Tech University.

The century between the 1870s and the 1970s saw a dramatic revolution in Americans' understanding of issues related to environmental health. By 1980, today's medical and regulatory frameworks were in place to address them. However, as scientists continue to identify new global environmental threats to health, the time may have come for new and creative approaches to challenges that sometimes seem overwhelming.
